

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

1920

(Order No. 5, Current Series)

CITY OF PITTSFIELD

In the year one thousand nine hundred and twenty.

AN ORDER

Providing for the Printing of the Annual Reports
and of the City Manual.

In Board of Aldermen, January 5, 1920.

ORDERED:—

1. That the Joint Committee on Printing be hereby authorized and directed to cause to be printed four hundred and fifty copies of the annual reports of the several city officers and departments for the year 1919, in such style and manner as it shall deem proper.

2. That the Mayor's inaugural address delivered January 5, 1920, be printed with the annual reports above provided for.

3. That the committee cause to be printed such additional number of separate reports as may be deemed necessary by the several boards and officers issuing the same and approved by the committee.

4. That the committee cause to be printed five hundred copies of the manual of the City Government for the current municipal year together with the Rules and Orders of the City Council in such style and manner as it shall deem proper.

Approved January 6, 1920.

Office of City Clerk.

Pittsfield, January 6, 1920.

A true copy.

Attest:

MICHAEL F. QUINN,
City Clerk.

HON. LOUIS A. MERCHANT
MAYOR OF PITTSFIELD

INAUGURAL ADDRESS
OF
MAYOR LOUIS A. MERCHANT
TO THE
PITTSFIELD CITY COUNCIL
MONDAY, JANUARY 5, 1920

Gentlemen of the City Council:—

We are met to-day for the purpose of organizing to perform the public duties which election to office has imposed upon us. It is unnecessary for me to say, for I believe you all appreciate that with our election to office, we cease to become members of a political party, and have only one single duty, and that is, to the City of Pittsfield an efficient and intelligent administration of its important business. It seems to me better on this occasion to indicate to you briefly, the more important problems that press upon us for solution, rather than for me to attempt to lay out a definite program for you. We are soon to undertake the preparation of the annual budget, when all of the matters of which I am to speak will be presented to you in more detailed form. I intend at the present time to only indicate those which seem to me most important, and to which you should be sure to give immediate consideration.

The unusual growth of our city, and its broad extent of territory, impose upon us a great burden of public work, which together with the high price of labor and material at the present time, will demand of us the greatest care and thought, in order

to properly execute that which it is imperative for us to do, while at the same time, protecting as far as possible, the taxpayers of the city from any unnecessarily heavy financial burdens.

Finance

I present to you herewith for your information and consideration, a general statement of the financial condition of the city, an examination of which I think will emphasize what I have just said to you.

Debt Statement, January 1, 1920

Total Debt of all kinds incurred and outstanding as follows:

Water Debt	\$1,305,000.00
Sewer Debt	491,500.00
School Debt	531,000.00
Paving Debt	266,000.00
Sidewalk Debt	24,000.00
Park Debt	15,000.00
Permanent Improvement Debt	5,000.00
Playground Debt	13,000.00
Municipal Yard Debt	20,00.00
Epidemic Debt	7,500.00
Total Debt	\$2,678,000.00
Debts Outside Limit:	
Water Debt	\$1,295,000.00
Sewer Debt	394,000.00
School Debt	56,000.00
Playground Debt	13,000.00
Paving Debt	5,000.00
	1,763,000.00
Net Debt, January 1, 1920	\$915,000.00

Valuation for year, 1917	\$40,511,990.00
Valuation for year, 1918	41,154,200.00
Valuation for year, 1919	41,943,600.00
Gross Net Valuation	\$123,609,790.00
Average Valuation	41,203,263.33
2½% of above	\$1,030,081.58—Debt Limit
Less Net Debt	915,000.00
Present Borrowing Capacity	\$115,081.58

Paving

I believe it should be the broad policy of the city to formulate and carry out as expeditiously as it can with a regard to the expense involved, a comprehensive plan for the permanent paving of all our main arteries of travel. This work has been in a large measure accomplished in the past year. I recommend its continuance during the year to come, and particularly request, that you take steps for the permanent paving of Tyler Street. Tyler Street is one of the main entrances into the city. It is said that during the coming year the state highway running through Hinsdale, Dalton and Becket to Jacob's Ladder and Springfield, is to be completed. With this work in mind, the paving of Tyler Street becomes still more imperative.

It has been suggested that East Street should be permanently paved. The abutters on this street at its further extremity are almost entirely large companies, the Pittsfield Electric Company, The General Electric Company, The Pittsfield Coal Gas Company, The Berkshire Street Railway Company and the E. D. Jones Sons Company. The increasing work of these great companies will undoubtedly soon demand better facilities for access than now exist. The paving of that portion of East Street, which is near the park, seems more needed than ever, when we contrast its condition with the present improved condition of South Street. East Street presents a large problem.

We cannot do everything at once, but I recommend to you the formation of a special committee, to consider this whole situation, and to make as soon as it conveniently can, such recommendation as it may formulate for the care of this problem.

In extending permanent pavement in those sections of the city which are not main arteries of travel, it seems to me that, and this I think applies to the central portion of East Street, as a large part of the cost is to be raised by betterment assessment, that conferences should be had with careful consideration given to the wishes and desires of the abutting property owners on these streets. The city will perhaps feel more ready to permanently pave thoroughfares of this character, when it knows that the abutters, who are most directly interested, are ready to carry the financial burdens thereby created.

Schools

Pittsfield has reason to be proud of its schools. It is to be hoped that the same spirit of harmony that has prevailed in the past will continue in the future. Our most pressing school problem relates to the high school, where the increasing number of pupils will soon make some further provision absolutely necessary. The present high school building was erected at a great expense to the city. In making provision for any extension thereof, or any new building in which to continue its work, the most careful thought should be given, I believe, to what shall be done with the existing building. It is too good and too expensive a structure to be completely discarded. I would suggest that a special committee be appointed by the school committee, and if they desire, that there be included in the representatives all the city government to consider and plan for the solution of this problem. I think a careful study of the situation should be made when the large expense that confronts the city is born in mind.

Transportation

With the rapid growth of the city adequate transportation facilities have become imperative. Many people have acquired homes on the outskirts of the city, relying upon the continuance of existing means of transportation. It is our duty as far as we are able to provide them with this convenience, and I suggest to you, the formation and assignment of a committee, who shall devote their special thought and attention to the transportation problem in the city, and shall cooperate to such an extent as they probably can with the existing trolley systems, in advising methods, securing and making certain this transportation.

Police, Fire Department and Street Lighting

I think that our citizens have all been pleased with the lighting system that has been established here. The outgoing city government has made a contract which cares for the immediate future, and I think we can all congratulate them on their efficient work in this regard.

The police and fire departments have been, and will continue to be, efficiently and ably conducted. We must care properly for their current wants.

Parks and Playgrounds

I believe that one of the most important activities in which the city can interest itself, is the Americanization of its new citizens, and there is no better means to accomplish that result, than a proper development of those of the city's properties that are intended for the use and enjoyment of all and that form for us all a common meeting ground. I recommend that the city attempt to secure the improvement and development of the small plot of land fronting the railroad station, that it erect comfort stations where it seems desirable and necessary, and that it continue in the future its present policy of playground development. The city has undertaken no work, that I believe will have so good an influence on its future, as the work

that is done upon our public playgrounds, and I desire to express on this occasion, the appreciation that I know we all feel on the public spirited and uncompensated work of the playground commission. For the most part, little remains to be done but continue the policy they have inaugurated. The city should feel particularly indebted to ex-Mayor Bagg for his very munificent and public spirited gift to it of Clapp Park. He has expended without recourse to the city \$470.29 for certain work of development on that park that seemed imperatively needed. I would greatly recommend to you that the city immediately reimburse him that amount for which Mr. Bagg has given his check to Mr. Francis of the playground commission to pay for this work. Mr. Bagg has not only given land to the city but has expended nearly \$4,000.00 of his own money in addition thereto for which no reimbursement is made to him by the city. Clapp Park needs for its best utilization to have certain drainage arrangements made there at once. I am informed by the city engineer, that this can be best cared for, when a broad plan is made for the surface drainage of that general section of the city immediately adjacent to the park. I recommend that this matter be given immediate attention.

Conclusion

I have endeavored to present to you the problems that more immediately confront us, and which I believe, we are called to carefully consider at once. Many other minor problems will suggest themselves. Under the budget system, there will be ample opportunity for us to confer and consider the matters I have outlined, and other important details of the city administration.

I wish for you all a pleasant and successful term of office, and I look forward with greatest confidence to your personal help and support, in my performance of the important duties which I assumed to-day.

REPORT OF THE PARK COMMISSION

To His Honor, the Mayor and the Honorable City Council:

Gentlemen:

We have the honor to submit the seventh annual report of the Park Commission. Daniel F. Farrell was re-appointed a member of the Commission, April 28, 1919 by Mayor William C. Moulton for a term of five years beginning May 1, which appointment was confirmed by the Board of Aldermen April 28 and by the Common Council May 14. Mr. Farrell renewed his oath of office June 1, 1919. The Commission reorganized by re-electing Fred T. Francis as chairman and John M. Flynn as clerk.

The addition of the Clapp property to the city's fine park and playground system was the most notable event of the year from a development standpoint. Ex-Mayor Allen H. Bagg presented to the city as an enduring memorial to Edwin and Jason Clapp a tract of land on the south side of West Housatonic street comprising 16 1-2 acres, carrying out the wish of his wife, Mrs. Mary Clapp Bagg. The property has a frontage of over 700 feet on West Housatonic street and is ideal for playground and park purposes. The presentation supplies a long felt need for a playground in that section of the city. Mr. Bagg graciously equipped the park with up-to-date playground apparatus and right from the time it was opened it proved a mecca for persons desiring to enjoy outdoor life. The donor expended large sums in grading and making other improvements on the park which is now one of the most important links in Pittsfield's recreation centers. The vast assemblage at Clapp park to view the fireworks provided by Mr. Bagg July Fourth was a gathering long to be remembered.

During the year the city acquired the Wahconah park property and adjoining premises comprising about 50 acres to be developed and devoted to park and playground pursuits. The Pittsfield Cemetery corporation presented to the City three-quarters of the tract and this combined with the desire of the George W. Burbank heirs to have the property used as a public park made it possible for the city to obtain the same. Much of the land has been reclaimed by a process of filling in and a large tract will soon be available for purposes of holding circuses and other large gatherings without using Wahconah park proper which made an ideal place for the home of Pittsfield's Eastern league baseball club. The development of this tract will add immensely to the value of real estate in that section of the city.

Appropriations by Mayor Moulton and the City Council made it possible to curb the Curtin Triangle, clean out Spring-side pond, install a fountain and make other needed improvements at that beauty spot. The contract was let for a dam at Springside park but owing to weather conditions the construction of the same had to be deferred until the spring of 1920. The water line was extended from Springside avenue to the pond.

Bleachers capable of seating about 250 persons were provided for the Common and proved so popular the Commission hopes to be able to purchase some more the coming year. City league baseball and football games attracted large crowds to the Common who enjoyed the use of the bleachers and they also proved of great help in accommodating those in attendance at the high school football contests.

Intent upon developing recreational activities for all seasons of the year the Commission in the spring elected John A. Ford municipal recreation director to have charge of the playground work in the summer, to form a football league in the fall and develop the winter sports such as coasting, skiing, skating and the like. The summer playground work proved popular and successful as usual, much interest was created in the city baseball and football leagues operated under the supervision of

Mr. Ford but lack of finances made it impossible to do much more in winter activities than had been the case in previous years.

It is the plan of the Commission to enlarge the facilities for skating on the Common next winter. It is proposed to have a rink that will cover a goodly portion of the athletic field and to make this a success it will be necessary to erect at least a temporary building in which the skaters will be able to put on and take off their skates. This building would be heated and should be able to accommodate several hundred persons. In addition to the enlarging of the rink it is desired to build a snow slide as soon as the conditions warrant the slide to be kept in operation as late as possible. A snow slide was constructed late this winter as an experiment and gave much promise but the several storms rendered it impossible to develop the slide as the city laborers were compelled to devote their entire time trying to provide transportation facilities about the city.

The total attendance at the various playgrounds last summer was 63,329. The average attendance in the mornings was large but on the afternoons the Eastern league baseball team played in this city the playgrounds were practically deserted by the boys. Evening work for adults was conducted at various recreational centers but that feature of the work has not yet been developed to the extent the Commission aims to have it.

The Commission realizes that there are numerous improvements needed but owing to the financial situation would not feel justified in asking for the money to bring the same about at this time.

It is again urged that the Berkshire Street Railway company be compelled to remove its tracks from north of the city hall park because the same impair the beauty of that section and make it impossible to keep the park in proper condition.

Owing to the fact that a trolley strike starting early in August continued until after the close of the bathing season, the receipts at the Pontoosuc lake and Burbank park bath-

houses were not as large as anticipated. A detailed statement of the receipts at both bathhouses is on file with the City Auditor. A statement of appropriations and expenditures follows:—

PARKS AND PLAYGROUNDS

Appropriation in budget,	\$9,500.00
Transferred from Springside Park account,	200.00

REPORT OF THE POLICE DEPARTMENT

Office of the Chief of Police,
Pittsfield, Mass., January 1st, 1920.

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

In compliance with the City Ordinance, I have the honor to submit herewith for your consideration the Annual Report of the Police Department for the year ending December 31, 1919.

ORGANIZATION

The regular force consists of a Chief, Captain, Two Inspectors, two Sergeants, Matron and thirty-eight patrolmen, three of whom are detailed in the office and one for special work.

Roster of the Police Department

Chief of Police
John L. Sullivan

Captain
John Hudner

Inspectors
Daniel J. McColgan
Jedediah N. Shepardson

Sergeants
Stephen W. Monks
John H. Hines

Matron
Sarah M. Dean

Patrolmen
William W. VandeBogart
Henchel A. Stubbs
Louis O. Bastion
Peter M. Lamore
David J. Mangan

Charles A. Barry
R. Lawrence Naughton
Thomas E. Maxwell
Benjamin M. Horton
William J. Toner

William J. Keegan
 William P. Lasch
 William E. Dunn
 Dennis O'Leary
 John O'Connor
 John A. Blair
 Robert F. Boyd
 John B. Reardon
 Richard B. Rock
 John D. McNaughton
 William P. McCormick
 Daniel Dunn
 William H. Ford
 Arthur E. Croughwell

Thomas F. Hall
 Herbert A. Volin
 Alfredo P. Morano
 Rufus C. Murray
 Peter O. Ano
 James F. Grady
 Michael F. Callahan
 Francis E. Dwyer
 Joseph J. Kirvin
 Thomas J. E. Buckley, Jr.
 Martin L. Fahey
 Albert E. Haskins
 Fred Harrington
 Walter Butterly

Reserve Officers

Thomas V. Broderick
 Delphis G. Roy
 Ernest R. Rice
 Philip H. Colwell
 Joseph R. Kondey

Andrew J. Miller
 Charles J. Koch
 Arthur J. Fields
 Arthur J. Harper
 John R. Meacham

Superintendent of Police Signal System

Bartholomew Cummings

Chauffeurs

William B. Kirtland

Glenn H. Bond

George H. Graves

Retired

Ex-Chief William G. White
 Dennis Hogan

William Tobin
 Michael Fahey

William H. Marshall

Recommendations

I recommend that a Traffic Officer be placed at the corner of South Street and West Housatonic Street from 8 A. M. to 7 P. M. For the past year I have had a Traffic Officer at this point on Sundays and Holidays.

I recommend that another Traffic Officer be placed at the corner of Maplewood Ave. and North Sts. and a third officer at the corner of Tyler St. and Woodlawn Avenue. With the opening of the new state road from Springfield through Hinsdale, all the traffic will come through Tyler St. into the city and this means hundreds of automobiles will prefer to come this way.

In the near future, we must have another Motorcycle Officer.

I recommend an Officer at Pontoosuc Lake from June 1st to October 31 from 6 P. M. to 2 A. M. as I have received many complaints from the residents and it seems unreasonable that hundreds of people living at Pontoosuc Lake must stand for the noise, etc., that some of the people think they have a right to make, just because they rent a cottage for two weeks.

I recommend a bicycle police officer for West Pittsfield, Stearnsville and Tillotsons. A bicycle officer for Lakewood and the Junction during the Summer months.

A police booth should be established at Pontoosuc Lake, the Junction and West Pittsfield; same to be connected by telephone with Headquarters; where the citizens of these districts could find a patrolman at certain hours of the night or could telephone direct to the Police Station.

I recommend a new Patrol Auto and Touring Car, trading in our three present cars toward same. We have had these cars too long and the upkeep of old cars is unreasonable.

In the past when a Police Officer has been suspended for any length of time, there has been no doubt that it has and does inflict punishment on his family. I would recommend in the near future and in certain cases, that his vacation and days off be taken from him. This will punish the man and not his family.

I wish to call to your attention, that we have had no new patrolmen appointed in 1919. The appointment of five officers

only filled vacancies. I have not asked for any patrolmen this year. We have had for the first time in years a full reserve list. Our salary increase attracted a nice clean set of young men that any City should be proud of.

I recommend that the City Council of 1920 appoint a special committee in reference to the parking of Automobiles on North, Penn and Dunham streets, that the City provide some parking space, where Automobiles can be parked. The automobile owners are now using North St. for a garage and a stop should be put to this practice. It is as unreasonable for automobile owners to leave their machines on our main streets, as it was to hitch horses on our streets twenty years ago, and I believe now is the time to fix a City Ordinance regulating where and how long automobiles may stand on our Main streets. Every year sees an enormous increase in our Automobile traffic. Dunham street should be a non-stop street and our streets should not be used as repair shops.

Remarks

I wish to call to your attention the decrease in the number of arrests for drunkenness from July to Jan. 1, 1920. This feature of police work, the arrest of drunken men, a most unpleasant and disagreeable task has gone forever. Our streets at 10.30 P. M. are clean, our saloons are not turning out hundreds of men at eleven o'clock, drunk and ugly. Police officers will have more time to devote to more important work, the care and safety of human lives and property. More than one serious break has been made while an officer has been arresting a poor drunk.

During the past month, I overheard a citizen, who should know what a police department does, say, "When Saloons and Drunks pass away, the Police shall pass away, too." I sincerely hope that this article will meet his eye.

The Duties of a Police Department

The duties of a Police Department are Prevention of Crime, preservation of public peace, detection and arrest of offenders,

traffic, suppression of riots, mobs, dispersing unlawful and dangerous assemblages which obstruct the sidewalks and streets, parks, and public places, strikes, removal of nuisances, prevention of fires, attendance at all fires and investigation of same, attendance at public places and affairs of all kinds, the arrest of suspicious persons, investigation of crimes. Strangers and children are protected and advised, gambling, prostitution and lottery places absolutely prohibited, dangerous and insane are cared for, the care of children, prevention of juvenile crime, instruction of our foreign people by advice and help so they may become good citizens.

The care of forty-two million dollars worth of property, the care at night of forty-five thousand sleeping people, and the safety that only a police officer in uniform can give you. The sight of a lone police officer has prevented many crimes. Many of our citizens who are sick and nervous and who do not sleep at night and the ladies who have no men folks in the house, watch with contentment the regular passing of the officer each hour.

I am positive that the city receives a dollar for every dollar spent, for the maintenance of her Police Department. Mr. Citizen, we the police officers of this city are giving you a quiet and efficient police administration.

One of the best assets a city can have is a good efficient Police Department. A new merchant, corporation, or city visitor intending to locate in a city first asks, "Mr. Mayor, what kind of a police department have you?"

During the past year we have had considerable trouble on different streets, parks, etc., with dice and card playing for money.

For the young man and boy it leads to stealing from his employer, it steals his health, trouble and disgrace follow and again, he is working for the professional gambler.

I am pleased to state that our city is clear of any regular gaming rooms and our pool rooms are carefully policed. In the past the City Council has been very careful to whom they have granted licenses and transfers.

Some of the Important Acts of the Police Department

One of the most important acts of the department, that stands out clearly, was the meeting of the Pittsfield Police Department, the day following the police strike in Boston when the following resolution was adopted:

"Agreed not to join any labor organization, believing that public interest is paramount to our personal interest, we hereby agree that under no circumstances will we become members of any labor organization; that we believe that the citizens whom we serve will appreciate and safeguard our interests to the same extent that we are hereby undertaking to protect theirs."

Other important acts were, the arrest of Bruno Mazzatto for murder by Officer Daniel Dunn, one hour after the crime had been committed.

The arrest of two of the cleverest confidence men with long records and known to all Police Officials in the United States.

The arrest of Harold Hobbs and John Marston, the latter being regarded by the Boston police as a very clever automobile thief. From this arrest information was secured that later lead to other arrests in Boston and New Hampshire, and the recovery of stolen automobiles.

I want to call your attention to our juvenile page in my report. I am sure that it shows we have a clean City. I cannot express in words, strong enough, the wonderful work that our institutions are doing for our boys and girls and young men and women. The Boys' Club, The Business Women's Club, the F. M. T. A., Y. M. C. A., the Boy Scouts and our Playgrounds. Why our citizens do not show more interest in our playgrounds and parks is a mystery. It seems that this important work is left to the same hard working citizens who have stood behind all our young peoples' clubs.

During the month of June, if we can get the permission of the School Department, which I think we can, I am going to send officers into the different schools for a Safety First talk of fifteen minutes on traffic regulations, to teach them that the

police officer is their friend. Children always ask some man for information, but never a woman. I want to instruct them to always look for a police officer to secure any information desired.

I wish to call to your attention that we should have some ordinance or better State Law that would put a stop to young girls from ten to eighteen years of age selling tickets or books on our streets. I have noticed many times that the girls selling tickets to men approach them in a too friendly manner, holding on to their arms, following them to their offices, standing insults from some, meeting a class of men they should never meet.

Traffic

I want to call to your attention the efficient way that the traffic men on Squads A and B have handled traffic.

You will also notice where I have placed silent Policemen for the Winter as well as in the Summer.

With our new paved streets our traffic will move along at a faster rate of speed. Our street accidents are less than any other City of our population. On account of our location, our traffic in number of vehicles will compare favorably with a city of 100,000.

With the opening of the following State Roads from Albany and from Springfield through Hinsdale, our traffic will be enormous.

During our recent Electric Car Strike, we had close to 190 Jitneys running. With this increase our officers handled the same without accident. There is no branch of Police Work performing a greater function than Traffic work. The life and limb of thousands of people daily, depend on a single police officer sometimes.

The following letter of commendation speaks for our Police work on all occasions:—

To The Editor of the Eagle:—

As a Summer resident in your midst, I take this opportunity of commenting briefly on the efficient manner in which the Pittsfield Police handled the crowds of people and auto traffic

on Labor Day. While it may seem an insignificant incident, tremendous confusion would have resulted had it not been for the splendid work of the Police.

Never in all my experience in New York or elsewhere, have I witnessed such a smooth handling of a large tumultuous crowd in such a small area. Never have I encountered such alert, energetic, yet courteous, policemen, who furnished absolute protection to the pedestrian and intelligent guidance to the motorist.

It is my humble opinion that Pittsfield may well be proud of its up-to-date, well trained Police force, whose results speak well for its administrative and Executive head.

H. BARTON HODGES.

Holmes Road, Pittsfield.

Sept. 2, 1919.

Detective Bureau

The detective bureau under Inspector McColgan, has had a very successful year, I am glad to say. They have worked hard and have got results. With the new change in automobile laws in the sale and transfer of motor vehicles, it adds more work to this important division of Police work.

I want to call to the attention of the incoming Council of 1920, that I want their wholehearted support, and if they secure any information in reference to this department, or have any suggestions, to turn the same over to the Mayor.

I want to take this opportunity to thank the Press for the help and co-operation they have rendered the department.

I believe by giving information in reference to breaks and police news in nearby cities, it acts as a warning to the people of the city.

I find warning the public just before holidays, telling them just what the police expect of them in reference to traffic has been a wonderful help to the department.

The press has never printed the name of a woman witness, which has proven to be of great assistance in getting rid of the degenerate men and boys from our streets.

In the near future, I am sure they will omit the names of our women prisoners.

I have found that by being fair and honest with the reporters, they will not publish any news even if it is a good story, when they think it will interfere with the working of the department.

I believe it is dangerous practice when a city is having a wave of crime to hold back this important news from the citizens. A gang of crooks will not take a chance if they know the Public is watching for them.

The press has always been a power for Good.

I want to take this opportunity to thank the City Council for our increase in pay. It has attracted a nice clean set of men to the reserve force and now the patrolman will work harder to hold their positions.

In Conclusion

In conclusion I thank his Honor the Mayor, William C. Moulton, the Members of the City Council, the Honorable Judge, Charles L. Hibbard and Associate Judge, James Fallon and Frederick M. Myers, Clerk of Court, Thomas F. Conlin, Probation Officer, David L. Evans, Doctor Harry H. Bard, and our Matron, Mrs. James F. Dean, for their valuable service and hearty cooperation during the past year, and I also wish to express my appreciation for the excellent police work of the patrolmen, and hearty cooperation of Captain John Hudner, Inspectors Daniel J. McColgan and Jedediah N. Shepardson, Sergeants Stephen W. Monks and John H. Hines, Desk Officers, Louis O. Bastion, Charles A. Barry and William W. Vande-Bogart.

Respectfully submitted,

JOHN F. SULLIVAN,
Chief of Police.

REPORT OF THE FIRE DEPARTMENT

Office of Chief Engineer,
Pittsfield, Fire Department.

To His Honor, the Mayor, and the Honorable City Council.

Gentlemen:—

I have the honor to submit the Annual Report of the Pittsfield Fire Department for the year ending December 31st, 1919.

I herewith submit the report of the work of the Pittsfield Fire Department which will include a list of fires and alarms, the causes of fires as near as could be ascertained, the value of property at risk, the amount of loss, the insurance, and the insurance paid on same, recommendations for the ensuing year and other information which I deem of interest.

Fire Alarms

The department has responded to 128 alarms during the year of which 35 were box alarms, 88 telephone calls, 5 verbal calls; three of the box alarms being false, a total of 51 less calls than last year.

Apparatus

The apparatus of the department consists of one 75 foot American-LaFrance Gasoline electric, four wheel drive aerial truck, one Pope Hartford Combination, one Pope Hartford service car, two Seagrave Combinations, one Chief's car, one Metropolitan engine, one Silsby engine in service, two old Clapp & Jones engines, two Combinations wagons in reserve.

Apparatus Distributed as Follows:

CENTRAL STATION:—One motor aerial truck, two motor chemical combinations, one Chief's car, one service car, one Metropolitan engine and one Silsby engine.

MORNINGSIDE STATION:—One motor chemical combination, one horse drawn chemical in reserve, one Clapp & Jones engine and one small truck in reserve.

Permanent Force

The present organization is constituted as follows:—Chief Engineer, one Deputy Chief, two Captains, two Lieutenants, one mechanic and 30 men.

Call Force

The Call Force of the department consists of 15 men.

Volunteer Force

West Pittsfield Company has a volunteer force of 50 members.

Hose

Number of feet of 2½" hose in good condition 9,000.

Recommendations, 1920

I would recommend a concrete apparatus floor, new doors and window sash at the Central Station as the building is very much in need of repair, also all electric wires now in attic of this station be overhauled and placed in a safe condition. Central station to be painted inside and outside.

The tenement at the Morningside Station to be repainted.

I would recommend the purchase of a new Chief's car as soon as possible as the present car is old and worn out.

I would recommend the purchase of a motor city service ladder truck. The department is handicapped outside of the business districts without this piece of apparatus.

I would again recommend a fire station at the junction of Wahconah St. and Peck's Road.

Number of feet of hose laid and used,	20,900
Chemical Tanks used,	27
Extinguishers used,	64
Rubber blankets used covering goods,	39
Men left on duty after fires,	34
Extinguishers charged outside department,	217

Fire Department Inspection of Buildings, Business District

Buildings inspected and found clean,	5,550
Cellars reinspected and cleaned,	147
Rear of buildings reinspected and cleaned,	7
First floor of buildings reinspected and cleaned,	20
Second floor of buildings reinspected and cleaned,	5
Third floor of buildings reinspected and cleaned,	3
Hallways of buildings reinspected and cleaned,	1
Stairways of buildings reinspected and cleaned,	1
Buildings with empty fire pails, refilled,	5
Total inspections and reinspections,	5,739

Days of the Week on which Fires Occurred

Sunday,	13
Monday,	25
Tuesday,	18
Wednesday,	13
Thursday,	22
Friday,	15
Saturday,	22
Total,	128

In conclusion I wish to express my appreciation of the able manner in which the officers and members of the department have performed the duties required of them and to thank the Mayor, the Fire Department Committee, members of the City Government and others who have in any way assisted the department in attaining its high standing, also the Chief of Police and the force under his command, for the able performance of the duties required of them in connection with this department.

Respectfully submitted,

W. C. SHEPARD,

Chief Engineer Fire Department.

REPORT OF THE SUPERINTENDENT OF FIRE ALARM AND POLICE SIGNAL SYSTEMS

Pittsfield, Mass., January 1, 1920

To His Honor, the Mayor and Members of the City Council.

Gentlemen:

I herewith submit my Annual Report of the Fire Alarm and Police Signal Systems for the year ending December 31st, 1919.

All the apparatus is in good condition. Improvements were made by placing boxes on the newly paved streets on standards, removing boxes from telephone and electric light poles and placing them on iron standards and installing more terminals for testing purposes.

Changes were necessitated on the overhead wiring on account of the changing of pole locations made by the Telephone and Electric Light Companies. Fifty cross arms and about two miles of iron wire were used.

Six iron standards were added to the system as follows: Corner of North and Springside Avenue, three on South Street and one at the corner of Center and West Housatonic Streets.

No new boxes were purchased during the year as I thought it more advisable to use the money for cable of which 2500 feet were purchased for North Street.

The only trouble on the systems during the year was during the month of February when No. 2 circuit was put out of commission by electrolysis caused by poor bonding on the Berkshire St. R. R. Company's rails. Four thousand feet of wire were used on East and Elm Streets to replace the wires which were burned and grounded.

General Inspections are made monthly and all boxes in the city were tested four times during the year.

One new Police Signal Box No. 45 was purchased and installed on South Street opposite Church Street.

I would recommend that a new Register and Recording Set be purchased for the Police Station and all Boxes be changed to do away with the use of local batteries.

Respectfully submitted,

BARTLEY CUMMINGS,

Supt. Fire Alarm and Police Signal Systems.

REPORT OF THE CITY SOLICITOR

January 30, 1920.

*To His Honor, the Mayor and the Honorable City Council of
the City of Pittsfield:*

In accordance with the requirements of the city ordinance, I have the honor to submit herewith the following report of the Legal Department of the city for the municipal year ending with the first Monday of February, 1920.

Pending Litigation

The following is a list of causes now pending:—

BERKSHIRE SUPERIOR COURT

4017 City of Pittsfield vs. Weed & Walsh and American Surety Company.

This is a suit brought on behalf of the city on Wahconah Street contract for repairs to the surface of Wahconah Street. The repairs on Wahconah Street for five years have now been completed and the amount due from the defendants is ascertainable.

4285 Isabelle A. Carey vs. City of Pittsfield.

4290 Mary V. Farrell vs. City of Pittsfield.

HAMPSHIRE SUPERIOR COURT

2185 Town of Easthampton vs. City of Pittsfield.

HAMPDEN SUPERIOR COURT

13446 William H. Brooks vs. City of Pittsfield.

Finished Litigation

The following is a list of litigated cases completed during the year:—

SUPREME JUDICIAL COURT

Secundo Amerio vs. City of Pittsfield (Petition for writ of Certiorari)
 Secundo Amerio vs. City of Pittsfield (Petition for writ of Mandamus).

These petitions attacking the validity of the lay-out of the Silver Lake Boulevard have been dismissed.

BERKSHIRE SUPERIOR COURT

- No. 2363 Mary J. McMahon vs. City of Pittsfield.
- 3261 Mary E. O'Connor et al vs. City of Pittsfield.
- 3798 Minnie E. Miller vs. City of Pittsfield.
- 3825 J. Edward Murphy vs. City of Pittsfield.
- 3869 Maurice P. Fitzgerald vs. City of Pittsfield.
- 3922 Elizabeth Murphy vs. City of Pittsfield.
- 4111 Tax Collector vs. Frank W. Hubbell.
- 4133 James C. Murphy, executor of the will of Annie J. Shaughnessy vs. City of Pittsfield.

MIDDLESEX SUPERIOR COURT

- No. 20511 Daniel A. Dorey vs. City of Pittsfield.

Claims

During the year a number of claims have been filed against the city which have been adjusted in those cases where there seemed to be legal liability.

Special Acts of Legislature

By Chapter 161 of the Special Acts of 1919, the city was authorized to make certain payments to Margaret Condron, widow of Michael F. Condron, and Henrietta Bartell, widow of Frank Bartell, loyal members of the Police Department, who died while in the service.

By Chapter 99 of the Special Acts of 1919, the city of Pittsfield was authorized to pay certain sums to Daniel W. Dunn, Francis E. Dwyer, Richard B. Rock, Benjamin M. Horton, William J. Toner, James R. Connors, R. Lawrence Naughton, Joseph J. Kirvin, Rufus C. Murray, Alfredo P. Morano and J. D. McNaughton, members of its police department, for volunteer services rendered by them during the epidemic in the fall of 1918.

The City Council petitioned the Legislature to establish the salary of the Mayor at Twenty-five hundred dollars. By Chapter 154 of the Special Acts of 1919, the Legislature provides that the Mayor shall receive a salary not exceeding Eighteen hundred dollars per annum. The figure of Eighteen hundred dollars per annum was adopted by the City Council of 1919.

Sale of Necessaries

In August, 1919, the City Council ordered that "Whereas, as a result of the world war or otherwise, the high prices maintained or necessitated and the hoarding or unavailability of foodstuffs and other necessities, a public exigency and emergency now exists" a special committee be authorized to obtain, provide and distribute food and other necessities.

Street Railway Conference

Upon invitation of the Mayor conferences were held at the City Hall of representatives from all Berkshire County municipalities which are reached by street cars. Committees from the Berkshire Street Railway Company and the operators attended. No definitive solution of this problem, which had vexed the entire Commonwealth, was attained; but a feeling of mutual confidence was established and the service has been resumed.

Jitneys

Closely allied with the street railway question is the problem of regulating motor vehicles for the carriage of passengers. A collection has been made of the regulations existing in various cities of Massachusetts.

At the special session of the Legislature in December, Chapter 371 of the General Acts of 1919 was passed. This act requires persons or corporations engaging in this business after April 30, 1920, to obtain a license from the City Council, subject to the approval of the Mayor and to operate subject to such orders, rules or regulations as shall be adopted by the City

Council. A licensee or a street railway company or any twenty residents of the city may petition the department of public utilities for the alteration of such regulations and the establishment of others; and the department may itself, after notice to the City Council, alter or amend any regulations.

Licensees must deposit with the City Treasurer security, by bond or otherwise, approved by the Treasurer and the City Council, in such sum as the City Council may reasonably require, conditioned to pay any final judgment for damage by reason of negligence of the licensee or his agents.

One of the early duties of the City Council of 1920 will be wisely to regulate the jitney business in a manner just to all the interests affected.

Land Acquired Clapp Park and Playground

By gift of Hon. Allen H. Bagg land on the south side of West Housatonic Street was transferred to the city upon March 24, 1919. Under the condition of the deed this land is "to be forever used for public purposes for the enjoyment and recreation of all as a park, common, or playground or any or all of these, as the proper municipal authority from time to time shall determine, and to be called the CLAPP PARK AND PLAYGROUND." This is a land court title.

Wahconah Park

Wahconah Park was acquired by the City by the following conveyances:—

- Book 395, Page 296. Joseph W. Kirchner, May 21, 1919. Land on the north side of Park Street if Park Street was extended westerly.
- Book 395, Page 327. Robert T. Kent and others. May 10, 1919. Land on the north side of Park Street next east of the above Kirchner land.
- Book 395, Page 338. Frank P. Cullen, Trustee. June 12, 1919. Land on the north side of Park Street if Park Street was extended westerly next west of the above Kirchner land.
- Book 393, Page 364. Samantha L. Burbank et als. June 7, 1919. Conveys the baseball park and adjacent land.
- Book 395, Page 365. Proprietors of the Pittsfield Cemetery, June 24, 1919. A large tract on the west side of Housatonic River.

By the condition in the deed from the Proprietors of Pittsfield Cemetery and the deed from the Burbank heirs, the land in each case is "to be forever used for public purposes for the enjoyment and recreation of all as a park, common, or playground or any or all of these, as the proper municipal authority from time to time shall determine."

The following additional deeds are also of record:—

Book 393, Page 422. James D. Harder et ux. Sept. 4, 1919, quitclaim of four parcels of land made for the purpose of confirming to the city the Pontoosuc School site before the additional land was bought of Harder in 1919.

Book 393, Page 423. James D. Harder to City of Pittsfield. Sept. 4, 1919. Land on North Street next northerly, easterly and southerly of the old Pontoosuc School site.

Book 393, Page 393. C. Frank Reed by Tax Col. July 31, 1919.

Book 393, Page 394. C. Frank Reed by Tax Col. July 31, 1919.

Book 395, Page 388. C. Frank Reed by Tax Collector. Land was sold by the city by the following deed.

Book 395, Page 503. Alden P. Cardell. Quitclaim land west side of Courtland Street, Nov. 12, 1919.

Conclusion

The office of City Solicitor devolves by governmental mandate without aid from an incumbent; which makes it peculiarly gratuitous to comment on the fact that by the impending transfer of its brief the City's interests will be guarded ably. Flagrant as the allusion is, a long acquaintance with my successor impels me to make it.

I desire to thank the city officers for their uniformly courteous treatment throughout my term. Stones in the path were never strewn of them.

Respectfully submitted,

JOHN BARKER,
City Solicitor.

**REPORT OF THE CITY AUDITOR
OF THE CITY OF PITTSFIELD, MASS.**

March 25th, 1920.

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

The undersigned, complying with the requirements of Chapter 4, of the General Ordinance of the City of Pittsfield, presents herewith the twenty-ninth annual report of the receipts and disbursements, together with a statement of the City Debt, for the fiscal year ending December 31st, 1919.

Respectfully submitted,

E. T. LAWRENCE,
City Auditor.

REPORT OF THE INSPECTOR OF BUILDINGS

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I herewith submit my report as Inspector of Buildings for the year ending December 31, 1919.

Total number of permits issued,	323
as follows:	
Single houses,	40
Double houses,	1
Store and tenements,	1
Hospitals,	1
Community Building,	1
Green Houses,	2
Barns,	9
Storage buildings,	4
Bottling plants,	1
Storage Warehouse,	1
Coal pockets,	1
Boiler houses,	1
Smoke houses,	1
Restaurants,	1
Store buildings,	8
Poultry houses,	6
Repairs,	12
Chimneys and smoke stacks,	6
Alterations,	26
Piazzas,	10
Metal signs and sign boards,	40
Additions,	27
Garages,	72
Buildings built of concrete,	28
Buildings built of brick,	19
Buildings built of hallow tile,	6
Buildings built of iron and steel,	4

Frame construction was used in all other buildings, alterations, and additions.

Permits issued for the installation of new freight elevators during the year 1919 were 4

Under the provisions of Section 6, Chapter 795, Acts of 1914, Seventy-Two applications to the Mayor and Aldermen for licenses to maintain garages in the first and second fire district were issued.

Number of lathing permits issued, 46

In accordance with the provisions of Section 3, Chapter 806, of the Acts of 1913, I have inspected all elevators in the City. I have made a practical test of the safety devices required therefor, and have filed a report of the results thereof with the Chief of the Massachusetts District Police.

Number of elevators inspected, 97

Seventy-Six (76) elevators are now in perfect condition, and certificates have been issued. All others have received some attention, and are being made to conform with the requirements as speedily as circumstances will permit.

Number of licenses granted to male operators of passenger elevators, 27

Number of licenses granted to female operators of passenger elevators, 4

Number of operators licenses renewed, 29

Amount of fees collected for licenses to operate passenger elevators was \$31.00

Amount collected for renewal of licenses was \$14.50

Amount of license fees paid to City Treasurer, \$45.50

In accordance with the provisions of Section 46, Chapter 655, Acts of 1913, I have inspected all hotels and lodging houses in the City and reported their condition relative to safety in case of fire, to the Chief of The Massachusetts District Police.

Number of rooms inspected in said hotels and lodging houses was 855

There were no prosecutions for violations of the building ordinances during the year 1919.

The estimated cost of new buildings, alterations,
and additions within the fire districts for which
permits were issued, was **\$748,600.00**

Respectfully submitted,

JOHN H. FLYNN,

Inspector of Buildings.

THOMAS E. FOLEY

Office of Board:

City Hall, Room 14.

Office of City Physician

311 North Street.

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

The Overseers of the Poor of the City of Pittsfield herewith submit their annual report for the year ending December 31, 1919.

The business situation in this city is in a very favorable condition. The unusual activity of trade through the country for the past four years is giving employment to almost every class of workers who are able and willing to work. The fact that commodities are nearly twice as high as three years ago, makes it very difficult for families who have no income and are dependent upon charity for support.

Much of the distress and expense caused by the Influenza late in the year of 1918 was carried over into the last year, and we have to care for a number of widows and their families owing to the bread winner being taken away by Influenza. Many of these widows are being cared for under chapter 763, Mothers' Aid, which enables the City to collect back one-third of the amount of aid expended under this law.

We wish to acknowledge the cooperation and assistance of all the Charitable Organizations of the City as well as that of many citizens who helped to lighten the burdens of the poor.

In this report no mention is made of bills payable or bills receivable, as they come in the cash payments and cash reimbursements of the next year.

APPROPRIATIONS

The appropriations for the Poor Department received and expended were:

Appropriated for Outside Poor,	\$16,000.00
By transfer for Outside Poor,	4,000.00
Appropriated for City Farm,	11,000.00
Total appropriated for Poor Department,	\$31,000.00
Received in cash reimbursements from all sources,	8,418.94
Net expenditures for Poor Department,	\$22,581.06

This makes the net cost of maintaining the poor about fifty-six cents per capita of our city population, for the year 1919.

OUTSIDE POOR

Appropriation,	\$16,000.00
By transfer,	4,000.00
Total expended by Outside Poor,	\$20,000.00
Received in cash reimbursements,	6,503.12
Net expenditures,	\$13,496.88

The itemized expenditures for the twelve months of 1919 will show in the Relief Tables.

Of the amount of \$20,000.00 expended for Outside Poor, \$14,652.76 was charged to the City of Pittsfield; \$4,290.68 was expended for State Poor; and \$1,056.56 was expended for persons having a legal settlement elsewhere within the Commonwealth but living in this city.

The number of families aided in 1919 was 258, comprising 411 males and 428 females, making a total of 839 persons aided.

Nine persons having no settlement within the Commonwealth were sent to the State Hospital at Tewksbury.

The following table of statistics will show the appropriation, cash reimbursements, and net expenses of the Poor Department for the past five years, and in five year periods from 1900.

Year	Appropriations	Reimbursements	Net Expenses	City Population
1900	\$20,000.00	\$1,843.11	\$18,156.89	21,766
1905	15,000.00	1,325.82	13,674.18	25,000
1910	19,600.00	4,484.23	15,115.77	32,121
1915	27,000.00	7,962.10	19,037.90	39,700
1916	26,500.00	7,420.32	19,079.68	
1917	26,500.00	5,336.90	21,163.10	
1918	29,341.57	8,271.99	21,069.58	
1919	31,000.00	8,418.94	22,581.06	40,000

Hospitals

This Department has supported in hospitals for various periods of time during the year, 85 persons.

Boylan Memorial Hospital, 2 at cost of	\$ 46.14
Hillcrest Hospital, 23 at cost of	907.27
House of Mercy Hospital, 59 at cost of	2,539.25
St. Luke's Hospital, 1 at cost of	68.58
	\$3,561.24

Cf the amount of \$3,561.24 paid to hospitals in 1919, \$2,058.03 was for persons having a legal settlement in Pittsfield; \$1,403.99 was charged to the Commonwealth of Massachusetts; and \$99.22 was charged to other cities and towns.

City Farm

The Overseers of the Poor have leased for another year the Smith Farm on West street, adjoining the City Farm. A good crop of grain and potatoes has been raised on this farm this year which makes it possible to keep more stock than if only the Home Farm was used. The house on the farm is occupied by one family, thereby saving payment of rent in the city for this family.

The inmates are mostly old, sick or infirm, and it is the purpose of the Board of Overseers to improve and make more comfortable the condition of these people obliged by circumstances to make the City Farm their home.

There were a smaller number of inmates cared for than for many years past.

Appropriation for City Farm,	\$11,000.00
Received in cash reimbursements,	1,915.82
Net expenditures,	\$9,084.18

The number of inmates at the City Farm January 1, 1919, was 58; 49 males and 9 females. There were admitted during the year 41; 7 died and 52 were discharged, leaving 40 inmates at the Farm January 1, 1920. 32 persons are between 60 and 90 years of age.

Elevation, 1,037 feet above sea level at Athenaeum steps.

Miles of streets, 105.

State roads macadamized, 11 miles.

Gravel streets and roads, 55 miles.

Number of bridges, 56.

Number of bridges maintained by railroad companies, 4.

Number of bridges maintained by state, 2.

Concrete sidewalks, 50.87 miles.

Gravel sidewalks, 24.68 miles.

Flag sidewalks, 1,450 feet.

Curbing, 17.63 miles.

Number of crosswalks, 678.

House sewer system, 61.17 miles.

Combined house and surface water system, $\frac{1}{2}$ mile.

Cost of new sewer system, \$1,001,409.82.

Manholes on new sewer system, 1,972.

Outlets to new sewer system, two to Housatonic River (emergency).

Surface water sewers, 17.14 miles.

Catch-basins, 839.

Hydrants, 610.

Water mains, 114.42 miles.

Connections to new sewer system, 4,761.

Estimated value of water works, \$2,502,313.93.

Estimated value of water works, \$2,502,313.93.

Streets paved, asphalt, bitulithic, wood and brick, 11.98 miles.

Main water valves, 1,143.

REPORT OF THE BOARD OF PUBLIC WORKS

Pittsfield, Mass., January, 1920

To His Honor, the Mayor and the Honorable City Council:

The Board respectfully submits herewith a report of the various departments in its charge for the year 1919.

Edward J. Spall completed his duties as a member of the Board on February 2nd, and was succeeded by David A. MacArthur. The Board as constituted for the year was George W. Faulkner, Chairman, Fred D. Retallick and David A. MacArthur.

The necessity for economy and retrenchment in city affairs on account of the very unstable condition of the country at large, the extremely high price of labor and material, and the high cost of living to our citizens, did not allow of any elaborate municipal expenditures which would add to the burdens already being carried. Aside from the paving program carried out by the City no other work of great magnitude was undertaken.

The year has not however been devoid of some much needed improvements. The water system has been extended through Swamp Road to Barkerville; the main water lines enlarged and extended through Pomeroy Avenue and Holmes Road affording adequate fire protection to Miss Hall's school, and to supply the residents of Pittsfield Gardens ultimately with water and fire protection; the elimination of the dangerous curve in the highway on West Housatonic Street near Britton Street has been accomplished; extensive repairs have been made to the North Street pavement; a new sidewalk has been built on Woodleigh Avenue; new sidewalks have been built on Onota, High Streets and Curtis Terrace, and new walks con-

structed about the High School; extensive improvements have been made in grading and gutter work on Oak Street, Second Street, Commonwealth Avenue, Lake Avenue, Hancock Road and Glenwood Avenue, as well as the erection of a large number of street signs.

Some much needed surface drains have been built in Boylston Street, Gale Avenue, Harold Street, and North Street, from the House of Mercy to Abbott Street. The latter drain should be of great benefit as it drains a large territory northerly from the House of Mercy.

In addition to the foregoing the Board's forces installed such preliminary work as was necessary on the streets paved during the year.

The maintenance of the pavement upon Wahconah Street was part of the Board's work, although properly belonging to the bonding company which acted as surety for the contractors on the work five years ago. The last year is the last for which the Company is responsible for the maintenance of the pavement. The City notified the contractors and their surety, the American Surety Company, in a legal manner, to make the repairs, and upon their failure to do so the work was done by the city. The total cost of the work for 1919 amounted to \$2,026.41 which has been placed in the hands of the City Solicitor for collection. There is due the city from the surety company about \$7,000 for repairs on this street, including interest.

The Board having in mind its experience with motor apparatus in the department, early in the year, purchased a tractor for use on highways. The machine is an International and the motive power gasoline or kerosene. The Board has operated it entirely with kerosene. The tractor has given great satisfaction and has been a great saver of labor and horse hire. The machine can do the work of three teams of horses, and do it much more satisfactorily. The Board seriously contemplates the addition of another machine to the department the coming year.

The highway question is the most vital one connected with the Board's department. How to do the work necessary to maintain 150 miles of streets with the \$20,000 provided in the budget for this work, is a question difficult to answer. It was not possible to do it when labor and material were much cheaper than they are to-day, but at the present time when the sum of \$20,000 is but the wages of 20 men for the year, it does not require a great amount of figuring to arrive at the conclusion that it cannot be done.

The amount appropriated for highways should be doubled at least, if we are to obtain any results, and even this amount would not allow of any permanent work. The minimum price of city labor has been placed at \$3.75 per day of eight hours. This with \$7.00 per day for teams makes the care of highways more and more of a complex problem, and any saving that can be made by the use of motor apparatus is desirable.

The Board is of the opinion that work of any extensive nature on streets should be done under the statute which allows for the assessment of betterments upon the abutters. This matter is presented to you for your serious consideration.

The Board had an opportunity early in the year to exchange the old Hudson car which has been in the department since 1915, and which cost at that time but \$800, for a Cole car Model Aero 8, by the payment of \$1400 and the old car. The Board deemed the offer decidedly advantageous for the city and made the exchange. The fact that the Board has had offers for the sale of the Cole car much in excess of what was paid for it is ample evidence that the City got a bargain in the exchange.

Street sprinkling has been done during the year by the department with its own equipment. Most of the work was done with motor sprinklers. The policy of the Board has been to use oil on most of the main arteries of the city. Oil was much more available than for last year and at considerably better prices. As a consequence a large number of the streets were

oiled. The Board favors doing away as much as possible with the sprinkling of streets with water as it damages their condition, while oil is a benefit to most of our gravel ways.

The water supply has been ample for all purposes during the year it being necessary at no time to curtail reasonable consumption. The water was running over the spillways of the dams for a considerable portion of the year. The rainfall has been considerably above normal which accounts for the full condition of the reservoirs. All the various reservoirs have been cleaned out, and repaired, and the hydrants on the whole system flushed twice during the year.

A fence of heavy steel wire mesh has been erected about the pumping station at Onota Lake, being of Cyclone make, and was furnished by the Peirson Hardware Company for the sum of \$1,065. There is some very valuable machinery in this station and its isolation made it easily accessible for acts of vandalism. The fence affords substantial protection. It is a source of great gratification to the Board to state that the water supply of the city is almost absolutely free from pollution.

The Board is still of the opinion that a charge should be made each year for hydrant rental for which the water department should be paid by an appropriation in the budget, or a book credit carried to show what the department is earning. If a credit of about \$18,000 for hydrant rental were shown each year it would make the financial statement show a much better condition, and would be but a just credit.

Late in 1918 the Board presented your Honorable body several plans for increasing the revenue of the water department. Up to the present time no action has been taken in the matter. The income from the sale of water should be sufficient to pay all interest, maintenance, and payment on debt charges, and leave a balance each year to be set aside in a sinking fund having in mind the elimination of the debt on the works. Even with no extension of the system it is going to be a great many years before the water debt is liquidated. The water rates in this

city are low as compared with other cities in the state, and at any rate the city is entitled to income adequate to prudently maintain the system.

The past year has seen the completion of the work of connecting the 18 inch line on Mill Brook. There has been a piece of 12 inch pipe on this line, between two pieces of 18 inch which prevented the city drawing its water from the Farnham dam system entirely in the event that such a condition made it necessary. The City has now a dual system and can draw water to supply all of the city from either the Ashley Dam or Farnham Dam systems.

Finances

The receipts and expenditures of the department for 1919 are shown below. The expenditures are shown as totals and any data in connection therewith which may be desired may be had by consulting the reports of receipts and expenditures as shown on the books of the Auditor, Treasurer and Tax Collector.

Receipts

For water rates meter and schedule,	\$123,765.17
From budget appropriation (Water Works Maintenance),	16,900.00
	\$139,665.17

Expenditures

For extension of mains,	\$35,400.19
For maintenance of works,	16,898.35
For interest on water debt,	53,930.00
For payment on debt,	100,000.00
	\$206,228.54

The receipts were slightly smaller than for 1919. This is accounted for by the fact the Silver Lake Mills, large users of water, were idle for most of the year, and to the fact that the railroads were much depressed during the continuance of the coal and steel strikes, less trains being used, and as a result less water being taken at the local station.

The table below shows the receipts and expenditures of the water department, the amount paid for construction and other expenses, interest on debt, and the receipts from the works, covering a period of years from 1857 to the present day. This information has been gathered from the reports of the Fire District and the City and are as accurate as it is possible to get the data with the material at hand, much of the reports of the old Fire District being meagre in detail and information.

COSTS AND RECEIPTS OF WATER DEPARTMENT

Water Works Statistics

Population, state census 1915, 39,807.

Water Works built by Fire District, 1855.

Sources of supply, Ashley Lake, Ashley Brook, Sackett Brook, Mill Brook, Roaring Brook, and an emergency pumping station located at Onota Lake.

Maximum capacity of reservoirs, 1,006,000,000 gallons.

Distribution by gravity.

Cost of maintaining works, \$16,898.35.

Extension of mains, \$35,400.19.

Interest on water debt, \$53,930.00.

Payment on water debt, \$100,000.00.

Estimated population supplied with water, 41,000.

Length of all mains, 114.42 miles.

Sizes from 3 to 24 inch.

Kind of pipe, cast iron.

Number of hydrants, 610.

Service pipes, cast iron, wrought iron, steel and lead.

Number of water meters, 656.

Number of elevators, 20.

TOTAL FOR YEAR.....45.04

Street Lighting

The lighting of the City has been done by the Pittsfield Electric Company under its contract as usual. During the year 53 incandescent lamps have been installed, 8 arc lamps, and four luminous arc lamps. There were 4 incandescent lamps discontinued. The total lamps now in use are 1496 incandescent, 177 arcs, and 124 luminous arcs.

The Board by order of the City Council executed a contract on December 26, 1919 for a period of five years covering the price for the maintenance of pedestal and other lights as follows:—For each luminous lamp \$116 per year, for each 1000 candle power lamps \$112 per year and for each 600 candle power lamp \$98.90 per year. These prices are subject to increase based on the cost of coal as follows:—For each increase of 1c in the cost of coal to the Company above \$6.70 shall be added to the cost of each luminous and 1000 candle power lamp 4c per year and for the same increase in cost of coal 3c per year shall be added to the 600 candle power lamp. A relative decrease shall be made in the price of lamps on each 1c decrease below \$6.70 per ton of coal to the company.

Sewer Connections

There have been added to the new sewer system 109 service connections during the year. This makes a total of 4761 connections to the system. Of course some of these connections were made to old houses, but the majority of them were for new houses, and considering the building conditions in regards to labor and material, the showing made is very satisfactory.

Sewer Assessments

The Board again calls your attention to the need of revising the rate for sewer assessments. The present rate was established in 1891. It is obvious that a rate established 25 years ago is not in keeping with present day prices. The City

Council has accepted the recommendation of this Board for an increase which would make the rate 65 cents per running foot based on a 100 foot depth lot, and the Board respectfully asks that the City Ordinances, Chapter 11 Section 20 be amended to bring about the required change.

School Repairs

Repairs have been made to the various school buildings owned by the City and they are in good shape. It is not possible to enumerate all the varied pieces of work done in different schools, but a few of the most important ones are given as follows:—

At the High School two individual motors were installed in the ventilating shaft by the Berkshire Electric Company at a cost of \$1,075. New window shades to the number of 20 have been put in, new door checks, and several pieces of plateglass. The desk and teachers' tables have been refinished.

All desks at the Commercial High School were cleaned and varnished.

The kindergarten room at the Crane School was thoroughly renovated, and all the furniture refinished, and the floors marked with the circles and other designs. All the desks in this building were also refinished during the summer vacation.

All desks and office furniture at the Briggs School were cleaned and refinished.

The outside of the Coltsville School was newly painted by Arthur Cowlin and the desks and other furniture cleaned and varnished.

New shades were placed on the old part of the Dawes School. The ventilators on the roof of the building were also renewed. All the desks and teachers' tables were cleaned and varnished.

A number of shades were renewed at the Mercer school and all desks were cleaned and varnished.

A new maple floor was laid in the north room of the Mercer Primary school which is used as the assistant principal's room, also the walls and ceilings on the second floor of this building were cleaned and painted two coats with lead paint.

At the Morewood School the desks were all cleaned and varnished during the summer vacation. This school has not, however, been opened for the winter term.

At the Nugent school about one-half the shades have been renewed. All the desks were cleaned and varnished.

All the desks and teachers' tables at the Peck School have been cleaned and varnished. During the paving of this street considerable filling was available from the excavation in the street and this was placed on the school lot to the depth of 12 to 14 inches. This has greatly improved the ground about the school for the children and has served to take off the fall of surface water.

All desks and tables at the Plunkett School were cleaned and varnished and the stairways refinished, and the kindergarten room thoroughly refinished as well as the furniture.

The West Part School exterior was painted by Troy & Daniels and all desks were cleaned and varnished.

All desks and furniture at the Pomeroy School were cleaned and newly varnished.

New shades were installed at the Rice School and all desks and tables cleaned and varnished.

At the Redfield School all furniture was refinished.

Only minor repairs were made at the Pontoosuc School as upon the completion of the new building the old building will be discontinued.

New shades have been put up at the Russell School and all desks and teachers' tables refinished.

At the Stearnsville School all desks have been cleaned and varnished, the kindergarten room refinished, and a new system of electric lighting installed in the building, this building being without lights up to this time.

Recommendations

Ordinary water extensions about the City.

Ordinary sewer extensions about the City.

Surface drain in Francis Avenue, Summer St. to Bradford Street.

Surface drains in First, Adam, and Second Streets to Lincoln Street.

Repairs to Abbott Street.

Repairs to Longview Terrace.

Mill Street paving and drains.

New highway bridge at Hubbard Avenue.

Improvements at the West Housatonic Street Municipal yard, consisting of garage, trestle, and siding as well as repairs to the present buildings to cost estimated at \$35,000.

The report of the Engineer of the Board is appended and gives in greater detail the operations of the various departments of the Board which have been under his charge.

The report of the Committee on Reforestation is also attached and gives a very interesting account of this most valuable department of the city having to do with its future water supply.

The Board takes this occasion to acknowledge its indebtedness to the Mayor and City Council for the numerous courtesies extended during the year, and to say a word of approbation to its various employees for their fine spirit in co-operating to bring about the best results in their several departments, as well as the harmony that has prevailed at all times.

Respectfully submitted,

G. W. FAULKNER,

FRED D. RETALLICK,

DAVID A. MacARTHUR,

Board of Public Works.

REPORT OF ENGINEER

Pittsfield, Mass., January 19, 1920.

To the Board of Public Works:

Dear Sirs:

I have the honor to submit the annual report of the work performed under the direction of the Engineer in the construction, maintenance and operation of the public works for the year ending December 31, 1919.

Engineering

The surveys, plans and designs of public work were made in the office of the engineer, together with the amounts of assessments for pavements, sewers and sidewalks. All new construction was in charge of the Engineer. All maintenance work, other than the water distribution system and school buildings, was in his charge, subject to the direction of the Board.

Surveys and plans were made on the following streets for the Committee on Highways:

Dexter Street, Marcella Avenue, Ontario Street and Elizabeth Street.

Surface Water Drains

The total length laid this year was 0.55 miles, in detail as follows:

Location	Diameter Inches	Length Feet	M. H.	C. B.
Boylston Street,	{ 18	12	3	4
	15	574		
First Street,	10	159	1	2
Hamlin Street,				3
Harold Street,	{ 12	176	4	
	10	312		
Hurlbut Street,	12	297	1	1
North Street,	{ 20	474	2	5
	15	353		
Peck's Road,	12	352	3	12
Silver Street,				1
South Street,	12	214		9

Sanitary Sewers

The total length laid this year was 0.93 miles, in detail as follows:

Location	Diameter Inches	Length Feet	M. H.
Benedict Road,	8	988	4
Dalton Avenue,	8	95	1
Hampshire Street,	6	438	2
Longfellow Avenue,	6	650	2
Peck's Road,	12	72	1
Perrine Avenue,	6	158	
Reuter Avenue,	6	300	1
South Street (reconstructed),	{ 8-10	867	3
	8	289	1
Thomson Place,	6	123	1
Woodleigh Avenue,	{ 8	711	5
	6	216	

Sewage Disposal

The usual work of maintenance was done at the sand filtration beds and the pumping station. The No. 1 (old) pump should soon be relieved by a new turbine pump and motor.

Maintenance of Highways

The highways, other than pavements, were maintained by scraping, removing mud and filling the most objectionable holes

and depressions with such gravel as could be readily obtained and soft coal cinders. A very limited amount of gravel was available and none was purchased in the bank, nor any broken stone.

Seventy streets, in whole or in part, were scarified and rolled with the maintenance roller. Gravel and additional broken stone in the amount of about 3000 loads was hauled from the excavation for additional Pavements to Bay State Road, Beech Grove Avenue, Center, Chickering and Church Streets, Circular, Columbus and Commonwealth Avenues, Crofut Street, Glenwood and Hawthorne Avenues, Mill Street, Pollock and Pomeroy Avenues, Seymour Street, South Mountain Road, Stoddard Avenue and Worthington Street. Some gravel was placed in sections of Bank Row, Bartlett, Dawes and Lake Avenues, Lyman and New West Streets, Park Place and Richmond State Road. The Maintenance Truck filled depressions in many other streets and proved to be a very satisfactory form of apparatus.

An unusual amount of soft coal cinders was used this year for repairs and was spread also on sections of Arlington Street, Benedict Road, Causeway, Depot and Hancock Roads, Howard, King, Mill and Newell Streets, Parkside Avenue, Peck's and Richmond Roads, South Church Street, Springside Avenue and William Street.

There were 69,892 gallons of asphaltic wood oil applied on Tyler Street, Dalton Avenue, West Housatonic, East and Elm Streets, Appleton Avenue, Crofut Street, West, New West, Linden, Onota, North, First, Fenn, Elizabeth, Wahconah, Seymour, Center and Fourth Streets; also 29,600 gallons of tar oil from the local gas plant were applied on East and Elm Streets, Lenox Avenue, West Housatonic, Onota and Lincoln Streets, Bay State Road, Boylston and Taylor Streets, Seymour and William Streets, Holmes and Peck's Road, North, East and West Streets, Pomeroy, Dalton, Weller and Springside Avenues, Churchill, New West, Weller and Charles Streets, Russell Terrace, Stoddard and Danforth Avenues, Myrtle and Curtis

Streets, Wellington Avenue, Merriam, Elizabeth and South Streets.

From the catch basins, 1,120 loads of material were removed and carted to the nearest dump.

Guard fences were rebuilt or repaired at Lake Avenue bridge, South and Wahconah Streets, North Street at Pontoosuc Lake, Upper Barkerville Road, Rice Bridge, Newell Street Bridge, Appleton and Parker Avenues, Causeway, South Mountain Road. Labor was furnished for a new iron fence at Pumping Station lot and abutting land of Peirson and Bardwell.

The pavements were repaired in the usual manner. In order to obtain the best results, an additional machine should be purchased for cleaning pavements.

City Stables

The city horses were maintained at the Lake Street Yard as usual.

Fifteen tons of hay were cut and stored from the Ashley watershed, eighteen tons from the Allen Farm and about ten tons at the Sewage Beds. A crop of 183 bushels of oats was obtained from the Ashley watershed and 3 tons of oat straw.

Additional Streets Accepted

Lincoln Terrace, Grove Street from Stoddard Avenue to Stevens line, Cromwell Avenue, Marcella Avenue, Dexter Street, Ontario Street from Elm Street about 950 feet northerly, Cole Avenue from South Street about 500 feet westerly.

Bridges

The entire wooden floor was re-laid on the following bridges: Onota Lake, Cascade Street, Hancock Road, (Churchill Brook),

Linden Street, West Housatonic Street (most westerly) and at Mill Brook. The floor at the car track was renewed in West Housatonic Street (Pomeroy) and Peck's Road (3). The upper layer of plank was renewed on Wahconah Street (Taconic) and South Street (River). The floor was partially re-planked at Holmes Road (Noble). Newell Street, Hubbard Avenue (Gov't Mill), East Street (Rice) and Second Street.

Construction and Maintenance of Sidewalks

Five sections of new cement walks were constructed, including walks and roadways around the High School.

The length of new sidewalks laid in city streets amounted to 0.61 of a mile, as follows:

Location	Type	Length in feet	Width in feet
Curtis Terrace,	cément	942	5
High Street,	"	367	5
Onota Street,	"	1403	6
South Street,	"	284	6
Tyler Street,	"	214	6

In addition, 940 square yards of cement walks and roadway was laid in the grounds of the High School.

Sections of tar walks were repaired on the following streets: North Street, West Street, Pomeroy Avenue, Center, West Housatonic, Linden, Wahconah, Burbank, First and Second Streets, Columbus and Maplewood Avenues.

Lumber

In the winter, timber was cut on the Mill Brook and Roaring Brook watersheds and sawed into plank and stringers for use mostly on repairing bridges and sheeting trenches. The amount sawed was 15,000 feet B. M. of spruce and 29,500 feet of hemlock.

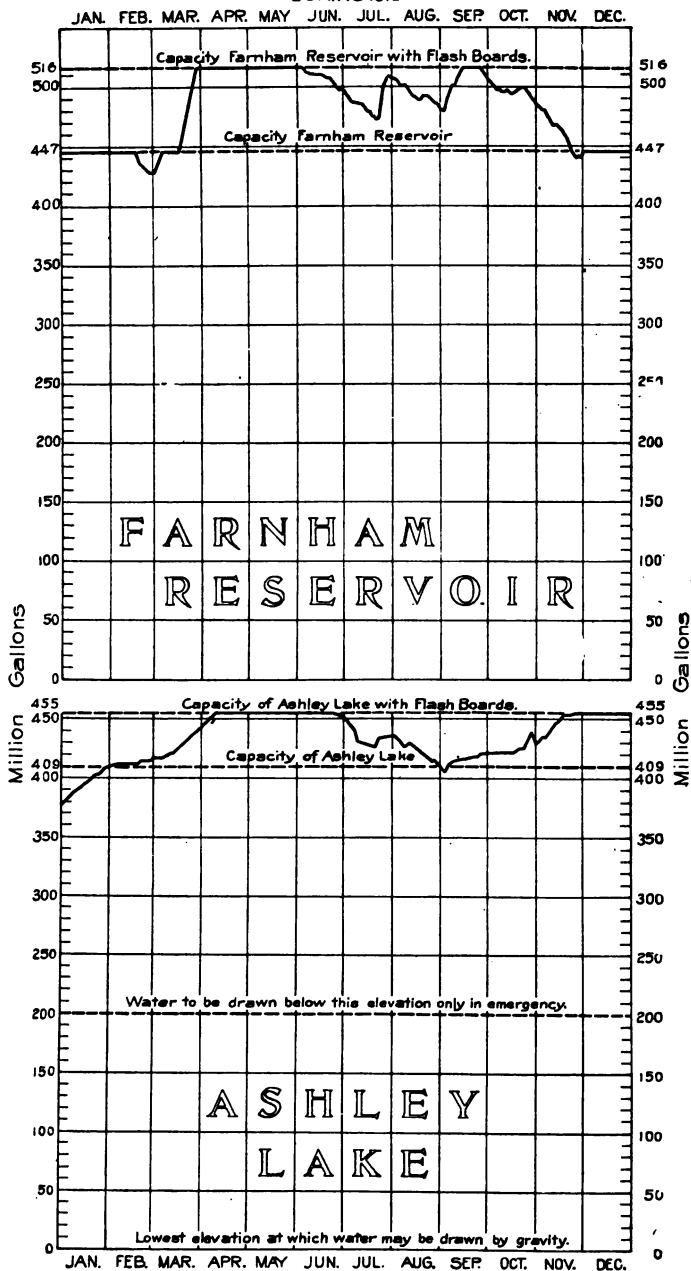

Fuel

From the Municipal Yard 1,055 tons of coal was delivered to the schools, 45 tons on requisition of the City Almoner, 47 tons to city departments and 47 tons was taken by the Supt. of City Farm.

Cord wood was delivered to the schools in the amount of 52 cords, to the public 128 cords, to city departments 30 cords.

The amount of water in storage at various periods of the year is indicated by the following diagram:

QUANTITY OF WATER STORED IN FARNHAM RESERVOIR AND ASHLEY LAKE DURING 1919

West Street,			1	
West Housatonic St. (relaid),	8	885	1	2-8"
Longfellow Ave.,	6	159	1	

Additional Pavements

Under the direction of the Committee on Paving, composed of the Mayor, Alderman White and McMahon, Councilman Wagner and Foley and the members of the Board of Public Works, additional pavements were laid in South, West Housatonic, Hurlbut, South Church, Union, North and Tyler Streets and Peck's Road.

On May tenth, bids on various types of pavements and in the aforesaid streets, were opened and read. It was thereupon decided to select buff paving brick and cement concrete as the types of pavement. The contracts were awarded on May 14th to the lowest bidders as follows:—Daniel J. Walsh of Pittsfield on South Street; Lindholm and Piscitelli of Pittsfield on West Housatonic, Hurlbut, South Church, Union, North and Tyler Streets; Lane Construction Corporation of Meriden, Conn., on Peck's Road.

The brick pavements were constructed of Mack 3-inch paving blocks with cement filler and a 1-inch mortar bed laid on a $5\frac{1}{2}$ inch concrete base. Longitudinal expansion joints were made at the curbs and transverse expansion joints at intervals of 100 feet and at street intersections. Contraction joints were made two feet from each rail.

The cement concrete pavement, mixed 1, 2 and 3, was constructed nine inches thick at the center and seven inches thick at the sides or curbs. Longitudinal expansion joints were made at the curbs and transverse expansion joints at the end of the work at noon and at night and at street intersections. Contraction joints were made about fifty feet from the transverse expansion joints and two feet from each rail. Nearly all the sand used was taken from the City Bed on Pomeroy Avenue, due to the difficulty of the Contractors in obtaining sand to meet the requirements of the specifications on cement concrete pavement; in the future it will probably be necessary to specify stone screenings mixed with local sand to overcome this trouble as the City Bed is nearly exhausted of sand. The cement for the work on South Street was the Vulcanite brand and on all other streets the Knickerbocker brand.

SOUTH STREET, Bank Row to South Mountain Road: work was begun on this street on or about May 31st and continued until December 2nd. From Bank Row to Buel Street the pavement is of Mack brick with cement concrete in the railway track; from Buel Street to South Mountain Road the pavement is of cement concrete, excepting near Boylston Street on the east side where Hillside brick is laid and similarly on Howard Hill, where both sides are of Hillside brick and cement concrete in the track; from near Boylston Street to the foot of Howard Hill no pavement is laid in the track, although it is planned to perform this work in the Spring. By the latter part of September the light bituminous macadam for the street railway track had not been laid and the season was too far advanced for such asphaltic work, this type of construction was originally planned, due to the uncertain condition of the rails. It was then decided to use a heavier form of construction and the contract was modified to substitute cement concrete in the railway track, re-lay the ties where necessary and weld the rails from the top next year. New granite curbs were laid at most street corners, cement curbs were constructed from Buel Street to South Mountain Road, except at the approaches to the Railroad Bridge, and loam filling and sodding placed.

WEST HOUSATONIC STREET, Hawthorne Avenue to Center Street: work was begun on this street on or about May 26th and continued until December. The square at Elizabeth, Center and Worthington Streets was paved with brick, at Hawthorne Avenue with asphaltic macadam and the remainder of the street from curb to curb with cement concrete pavement, a concrete beam was placed beneath the rails from Henry Avenue to Center Street. Curbs were laid for the length of the street. There remains some sodding and raking of the loam filling next spring and possibly a small amount of cement work.

HURLBUT STREET: work was begun on this street on June 10th and the same opened to travel on August 13th. The street was paved with brick, the granite curbs on the east side were re-laid and cement curbs were constructed on the west side. There remains two small sections of cement walk at the corners of South Church Street to be laid next spring.

UNION STREET, North Street to Northrup Street: work was begun on this street on or about August 1st and the pavement completed on or about September 1st. The entire work was not finished until November. The street was paved with brick and cement curbs were constructed on the south side.

SOUTH CHURCH STREET, beside Eaton, Crane and Pike Co.: work was begun on this street, as an extension of the contract, on September 25th and opened for travel on November 6th. The street was paved with brick and cement curbs laid on both sides. Payment was made in full by the Eaton, Crane and Pike Co. for this construction.

NORTH STREET, Burbank Street to Tyler Street: work was begun on this street on October 13th and the pavement opened for travel November 30th. The street was paved with brick and curbs laid on both sides, a concrete beam was laid under the rails. There remains some grading work to be done next spring.

TYLER STREET, North Street to First Street: work was begun on this street on or about October 20th and work continued until December 13th. The street was paved with

brick, curbs laid on both sides, the bank on the south side removed to widen the roadway and reduce the grade, and a cement walk laid which was extended around the corner on First Street. A cement wall was built against the foundation of the Farrell house and extended around a part of the Farrell property. Owing to a shortage of brick the section of brick pavement north of the track and extending from the east line of First Street westerly about 125 feet was not laid until December. There remains the work of grading, seeding and sodding next spring.

PECK'S ROAD, Wahconah Street to Highland Avenue: work was begun on this street on or about June 9th and completed on September 9th. The roadway was paved with cement concrete, 18 feet wide. About the middle of September some small cradle holes developed, which in November were filled with tar and sand at the expense of the Contractor.

REPORT OF THE COMMITTEE ON REFORESTRATION

Pittsfield, Mass.,
January 27, 1920.

*Board of Public Works,
Pittsfield, Mass.*

Gentlemen:—

The Reforestration Committee desires to make the following report of the work accomplished during the year 1919.

In starting our reforestation work at the water shed of the Farnam Dam, we thought it advisable to use the stock in the nursery. The nursery stock, being a three year old growth, had to be used immediately to get the full benefit of it. It is rather of an experiment in our using the trees directly from the nursery without having first been transplanted for at least one year.

We took the section west of the former McMahon farm, starting at the location of the old school house. In the immediate vicinity of the school house location, we planted some larch (probably about 2000 or 3000), as we desired to know as to how the soil on the mountain would do for the growing of larch trees. We gradually worked south along the old road, planting white pine and spruce, until we came to the old road near the lower reservoir. We left a small space between that road and the reservoir unplanted. We then worked west as far as the city land goes. Our figures show that we planted between 80,000 and 81,000 trees in that location.

After the water shed planting was done, we moved about 30,000 or 40,000 trees from the nursery and transplanted them in the location which we had prepared next to the pumping station on Pomeroy Avenue.

During the time of transplanting, we had but very little rain and the soil was very dry. Before we could get facilities to keep the trees watered, we lost considerable by the small trees not having enough moisture. After awhile, the weeds commenced to grow which, to a certain extent, shaded the trees and kept more or less dampness in the soil. In the fall of the year, we put in a number of young boys to weed between the rows. At the last inspection, transplants were doing very nicely.

It is also very satisfying to the Committee to know that the experiment of planting from the nursery to the field was very successful, as, on our last tour of inspection late in the fall, we found but very few—so as to speak—of the little trees that were dead. We estimate that we lost from $12\frac{1}{2}$ to 15% of the trees set out, where our loss ration on four year olds purchased from outside nurseries has been from $2\frac{1}{2}$ to 4% . But, when we consider the cost of the trees to us per thousand taken from the nursery, we can well afford to stand a much larger percentage of loss over and above those purchased from outside.

Our cost of planting, considering the high price of labor, has been very reasonable indeed and we have left, of the appropriation your Board granted us, \$109.51 unexpended.

Respectfully submitted,

A. K. SLOPER,
Secretary.

REPORT OF THE SCHOOL COMMITTEE

To the Mayor and City Council of Pittsfield:

The School Committee respectfully submits this annual report for the year 1919. It is a brief, general statement, dealing only with essential topics.

Finances

The financial policy of the Committee is to request, and to spend a reasonable appropriation, and to be sure that all of our expenditures are wisely made, and properly apportioned. Sufficient money should always be available to set high standards in our schools. The details of money received and expended will be found in the following report and in the various tables.

Buildings

Several of our school buildings are in very poor condition through lack of proper and timely repairs. This is not the fault of the School Committee, for this Committee has no power in the matter of repairs and alterations in school buildings.

Our schools are not provided with sufficient and proper equipment to guard against the danger of fire and if for this reason any loss of life should result, the responsibility will rest upon the Mayor and City Council who have already been warned repeatedly of this situation. Our pupils are compelled by law to attend school, and every means should be taken to guard them in their health and life. We therefore recommend that you take such action in these matters as will remedy the situation without delay.

Pontoosuc School

The Committee is pleased that the construction of the Pontoosuc School has been begun by the Special Committee appointed for that purpose as the building is much needed.

Salaries

The salaries of our teachers were appreciably advanced during the year. In addition to granting the flat increase of two hundred dollars petitioned for by the Teachers' Association, we granted the usual Fall increases and in special cases increases were made from \$840 to \$850 in order to enable the city to participate to a larger extent in the fund provided by the Commonwealth to be administered under the provisions of Chapter 363 of the General Acts of 1919.

In compliance with the wish of a large majority of our teachers we have provided for the payment of their salaries on a fifty week basis instead of forty as heretofore.

State and Federal Legislation

At this time there is a vast amount of proposed State and Federal Legislation. Such proposals cover most phases of school work. The chief features of interest to our Committee pertain to vocational training, Americanization, compulsory continuation schools of the part time type, and physical education.

Books and Supplies

It will be necessary to expend a much larger sum the ensuing year for books and supplies than usual owing to their increased cost and because for several years we have been skimping along on inadequate appropriations.

New Grade School

There is considerable agitation in favor of the erection of a grade school for the pupils living in the rapidly growing section

of our city known as "Lakewood." If it is decided to build in such a locality, it is hoped that care will be exercised to select a lot of sufficient size, in a suitable location and that provision will be made for the erection of a building large enough for our future needs and possibly to include the work of a junior high school.

High School Building

Pittsfield is confronted with a serious problem in the condition of its high school building. It is desirable that we be one of the bright spots in the commonwealth in meeting the education needs of our pupils. If the amount and quality of education each pupil receives depend at all upon the locality in which he is a resident, then let it be said that we have provided liberally; but this standard cannot be attained with inadequate facilities and our high school building under present conditions is undoubtedly inadequate. The cost of a new building however would be considerable and the question of finance therefore becomes important, and it is for us to give serious thought to this matter in order that we may arrive at a proper solution of the same without placing upon ourselves a burden too heavy.

Superintendency

On August 1st, 1919 Mr. Persons, our former Superintendent of Schools severed his connections with the Pittsfield Schools to accept a position offering a considerable advance in salary, and for the balance of the year we were without a Superintendent. The city was fortunate however that he left the department so well organized that with the co-operation which we have received from our teachers and principals and Mrs. Lucy M. Myers of the Superintendent's Office, it has been possible to carry on the schools with very little loss of efficiency.

Conclusion

This report would not be complete if in closing the Committee did not express its appreciation of the courtesy, impar-

tiality and ability shown by the chairman, Joseph E. Peirson. During his fifteen years' membership on the Committee, now terminated by his voluntary retirement, he has been diligent and faithful, thinking always and only of the welfare of the school children and the community.

SCHOOL COMMITTEE
OF THE CITY OF PITTSFIELD

By John B. Cummings.

REPORT OF PRINCIPAL OF THE HIGH SCHOOL

Members of the School Committee,
Pittsfield, Mass.

Gentlemen:

I herewith submit my third annual report of the high school for the year 1919.

Two new teachers have been appointed during the year, Mr. Allan J. Keaney, Physics, in place of Mr. Rodney W. Hewett, resigned, and Miss Rachel Morse, History, in place of Miss Louise Parsons, also resigned.

The total enrollment for the year was 947 for the spring term and 942 for the fall term with an average membership for the year of 855. This shows a very slight reduction over last year but when compared with the enrollment for 1914 of 1155, it shows how great has been the combined effect of high prices and good wages with a scarcity of labor upon high school attendance.

The number of graduates for the year is 127, of which 51 graduated in February and 76 in June. Of this number 31 secured honors, a most excellent showing. Twenty-two are now in college and fourteen are pursuing courses in normal schools.

There have been no changes in the curriculum during the past year. The course in Community Civics for all freshmen is now well under way and is proving to be most valuable. The principal believes that general sciences should also be required of all pupils regardless of what courses they are taking, but thus far it is not required of pupils preparing for college on account of the difficulty of finding a place for it among their subjects of study.

Little can be done in adding to our curriculum, which is of course woefully restricted, without a more extensive plant, but as this matter has been previously mentioned in reports it is not necessary to speak of it here. In the estimation of the principal, both teachers and pupils are making the best possible use of our present quarters.

Two improvements can be made in the line of permanent equipment which will greatly improve the present school and still be of service in a new building. The first is a well appointed lunch room. We have a satisfactory place for a lunch room. All the equipment which we might put in would be equally serviceable in a new building and it is earnestly hoped that this may be put in as soon as convenient. During the past year several attempts have been made to serve lunches, with good success as regards patronage, but lack of facilities has made it too laborious to continue while it also has restricted the menu to those things which are easy to prepare but which are not particularly nutritious?

The second thing, greatly needed now and equally serviceable for a new building is a system of individual lockers for both books and for clothing. The present cloak rooms could easily be torn out with a great saving of light and space and lockers could be substituted. When several groups of pupils use the same desks it is almost impossible to keep books from getting lost and also to provide a safe place for pocketbooks and other articles of value. It would greatly aid in the matter of administration and also be a great convenience to the pupils if this were done.

The principal takes pleasure in reporting that the extra activities of the school are in excellent shape. Athletics are self-supporting and many bills of long standing are gradually being paid off. One year will see them paid in full. The Glee Club and the organizations for debating, science, mathematics, current events, astronomy, salesmanship and other interests, are being regularly patronized. An extra period each week is provided for this work.

The system of mid-year promotions has been in vogue long enough for us to comment upon it with some degree of accuracy. The principal has been in charge of two large schools one of which promoted in June and one in February and June. He has had an opportunity to judge of the relative merits of the two methods not only by this experience but also by considerable study and investigation.

There are at present in our high school eight classes, each with its own organization, actual or potential, and each striving to preserve its own identity. These classes are not however clearly defined for, as promotion is by the point system, the loss by failure of a few points will throw a pupil out of his own group and into another. Often a pupil does not know whether he belongs to one group or another.

The principal argument in favor of mid-year promotions is that it saves a half year of a subject in case of a failure. This fact, and it is a fact, seems to work both ways. It undoubtedly saves a half year in case of a failure but, on the other hand, it makes failure twice as frequent and also half as serious. Pupils almost invariably find excuses for failure outside themselves and the tendency to condone a failure because it is *only* for a half year is very noticeable.

Many pupils prefer being in a class which graduates in June and some will even adjust their work so as to remain in school in order to graduate with a June class. Graduation is an important matter to the average pupil. The activities of a senior class in a modern school are and should be very dear to the hearts of the members. Try as hard as we may to equalize the privileges of all classes, it is true that those classes which graduate in June have more of an opportunity to exercise those privileges than those which graduate in February. The weather differences have much to do with this.

Furthermore there is a strong tendency for those who graduate in February to remain in school as post-graduates until June. Those who intend to go to college are compelled to do this in order to keep themselves in preparation for the

examinations which are held in June. Others also desire to remain to take extra work, some of them apparently for the reason that they do not wish to go to work quite yet. The number of post-graduates from a February class is always three or four times as great as those from a June class. This fact, together with the fact that failure is more frequent under the mid-year plan makes it doubtful whether the system saves any time to the pupil who fails.

The chief objection to the mid-year plan is not one of administration though that is a most valid one. In this connection the fact that the principal of the school is taken away from the work of supervision for a month, right in the middle of the school year, to look after the details of reorganization, is of no light moment. The chief objection is not, however, administrative but pedagogical. Pupils change teachers too frequently. Work is interrupted and an entirely new deal all around is made just at the time when the best work of the year should be done. It seems that no sooner does the pupil get into stride than he has to stop, change teachers, change divisions, change books, and once more go ahead under entirely new conditions.

The principal believes that the advantages sought under the mid year promotion plan are more than over-balanced by the disadvantages mentioned above. He believes that a school of this size can better serve the interests of the pupils by having yearly promotions, provided that a few teachers be detailed as special teachers for backward pupils. This will not necessarily increase the size of the teaching force for it is well understood that fewer teachers are needed under a yearly basis than under a semi-yearly basis.

In closing the principal wishes to gratefully acknowledge the help and encouragement given him by all connected with the schools as well as that which comes in a very large degree from the parents of the pupils.

Yours very truly,

LORNE B. HULSMAN.

REPORT OF SCHOOL ATTENDANCE OFFICER

To the Members of the School Committee:

Gentlemen:

My report for the year 1919 shows a decrease in the number of cases reported, amount of truancy, and various other school offences. This is most gratifying. In my opinion this comes from better home conditions and supervision. I am convinced also that prohibition has been the greatest cause for this improvement.

Cases of children being out of school through the misfortunes of home, lack of proper clothing, etc., have been much less frequent than in past years. Parents who have heretofore been very difficult to deal with, are now in many cases assuming the responsibility which is theirs to assume, and if these conditions continue there can be no doubt but this improvement will become more and more pronounced.

The following is a summary of my work for the year:

Unexcused absences,	1587
Cases of Truancy,	85
Truants,	72
Children taken into Court,	5
Children committed (Hampden Co. Training School),	2
Parents taken into Court,	2
Cases continued,	2
Children picked up on the street and taken or sent to school,	36

The following contagious diseases were reported by the Health Board and the children excluded from school:

Scarlet Fever,	37
Diphtheria,	6
Measles,	7
German Measles,	2
Chicken Pox,	77
Mumps,	54
Whooping Cough,	61
Pulmonary Tuberculosis,	5
Tetanus,	1

Respectfully submitted,

WILLIAM F. CODY,

Attendance Officer.

City Clerk.

REPORT OF THE INSPECTOR OF PETROLEUM

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I have the honor to submit herewith the annual report of the Inspector of Petroleum for the year ending, December 31, 1919.

56 tank cars, containing gallons,	462,017
Fees collected,	\$323.37
Fees paid to City Treasurer,	\$323.37

EQUIPMENT

Tagliabues, open fire tester, hydro- meters, thermometer, test jars and cups:	\$13.25
---	---------

Respectfully submitted,

JOHN F. O'KANE,
Inspector.

REPORT OF THE INSPECTOR OF SMOKE

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I have the honor to submit herewith the annual report of Smoke Inspector for the year ending December 31, 1919:

I find from the inspection of the various plants in the city that the majority are equipped with stokers, smokeless furnaces, or have boiler capacity of sufficient size to operate within the law. One plant has installed a new boiler of much larger capacity than the old one. Another plant is to be equipped with modern smokeless furnaces which the owners realize will mean economy and more efficiency. There are two plants which still have difficulty in complying with the law and I expect at an early date that the owners will install apparatus which will eliminate this nuisance.

• Twenty-five per cent of fuel burned in power plants has been wasted. This is partly caused by improper firing. Improper firing means inefficient combustion which is the cause of our smoke nuisance. This difficulty has been much improved.

It is well to bear in mind the statute in regard to the smoking of stacks. "The emission, except by locomotive engines or by brick or pottery kilns, into the open air of dark smoke or dense gray smoke for more than five minutes continuously, or the emission, except as aforesaid, of smoke during ninety minutes of any continuous period of twelve hours, within a quarter of a mile of a dwelling, is hereby declared a nuisance." Thus, there is no violation of the law if a stack does not emit dark or dense gray smoke more than five minutes continuously or more than one and one half hours of any continuous period of twelve hours.

Respectfully submitted,

JOHN F. O'KANE,

Inspector.

REPORT OF THE SEALER OF WEIGHTS AND MEASURES

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I have the honor to submit herewith the annual report of the Department of Weights and Measures for the year ending December 31, 1919.

	Adjusted	Sealed	Non-Sealed	Cond.
Platform scales over 5,000 lbs.,	4	22		5
Platform scales under 5,000 lbs.,	15	151	1	12
Counter scales,	4	187		16

Condemned,	228
Non-sealed,	2
Tested at office,	1,378

Sealed at office,	1,231
Adjusted,	83
Condemned,	147
Reweighting and measuring food packages, coal, etc.,	1,874
Peddlers of farm produce, etc., registered,	79

Eight cases in the district court for violation of weights and measures laws:

Two false scale. Guilty-fined,	\$25.00
Two unsealed scale. Guilty-fined,	25.00
One short weight in ice. Guilty-fined,	12.00
One short measure in fire wood. Guilty-fined,	6.60
One offering fire wood for sale without certificate of measurement. Guilty-fined,	5.00
One peddling without license. Guilty-fined,	

Total of fines imposed,	\$73.60
-------------------------	---------

Amount of fees received,	\$289.96
Fees paid to City Treasurer,	\$289.96

The following inventory shows property in custody of the Department:

The Official Standard. Total value \$826.00. One large office balance, set nickel plated steel weights, 50, 25, 20, 10, 5 lb. Set nickel plated brass weights, 4, 2, 1 lb., 8, 4, 2, 1, 1-2, 1-4, 1-8, 1-16, 1-32 oz. avoirdupois. Set troy weights 5 oz. to 1-10 gr. Set carat weights 50 carats to 1-100 carat. Set apothecary weights 2 drams to 1-10 gr. Set metric weights 50 grams to 10 m. gr., one kilogram. Set nickel plated dry capacity measures 16, 8, 4, 2, 1 qt., pint and 1-2 pint. Set nickel plated liquid capacity measures 1 gal., 1-2 gal., quart, pint, 1-2 pint, gill and 2 oz. graduate. Yard measure. Meter. Large show case for equipment. Two small cases.

Sealer's working equipment and office supplies. Total value \$1,005.79.
Analytical balance.

Portable balance in carrying case "modern."

Portable balance in carrying case "old type."

Set brass weights in case, 4, 2, 1 lb., 8, 4, 2, 1, 1-2, 1-4, 1-8, 1-16 oz.

Set nickel plated weights in case, 2-2 lb., 1 lb., 8, 4, 2, 1, 1-2, 1-4, 1-8, 1-16, 1-32.

Set grain weights in case, 1,000 grains to 1-500 gr.

Set apothecary weights in case, 2 drams to 1-10 gr.

Set troy weights, 5 oz. to 1-10 gr.

Set metric weights, 50 gr. to 10 m. g.

Set carat weights, 50 carats to 1-100 carats.

Set nickel plated steel weights, 20, 10, 5 lb.

Set hanger weights, 1, 2, 4, 8, 16 lb.

Forty 50 lb. iron weights.

Five gal. copper measure.

Five gal. galvanized measure.

One gal. nickel plated measure.

Set copper liquid capacity measures, gal., 1-2 gal., quart, pint, gill.

One gal. tin measure.

Set dry capacity measures, 16, 8, 4, 2, 1 qt.

One metal bushel basket.

Pint dry capacity measure, aluminum.

One-half pint dry capacity measure, aluminum.

Dry measure graduate.

Set liquid capacity graduates in case, 32, 16, 8, 2 oz.

One 250 c. c. graduate.

Counter platform scale.

Portable platform scale.

Grain hopper, 2 yard measures, sealer's anvil, heater for branding irons, one branding iron, 9 steel dies, sealing stamp, weight stake, 2 spring balances, 50 ft. steel tape.

Striking rod, slicker plates, funnels, 2 drill presses, 2 dry measure gauges, 2 six foot rules, potato shovel, appliance for ice scales, cubic foot box, aluminum seals, lead wire, wire seals, paper seals, tags, coal weighing book, record book, receipt books, weight cards, rubber stamps, roll top desk, chairs, steel case, office supplies, work bench and kit of tools.

Respectfully submitted,

JOHN F. O'KANE,

Sealer of Weights and Measures.

REPORT OF THE PUBLIC WEAIGHER, CITY SCALES

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I have the honor to submit herewith the annual report of the weighing at the City Scales, for the year ending December 31, 1919.

Total number of loads weighed for public,	3,477	
Total number of loads of coal weighed for City,	189	
		3,666
Weighing fees received,	\$347.70	
Measuring four loads of wood,	.40	
Paid City Treasurer,		\$348.10
Weighing fees from Fuel account credited to City Scales account,		18.90
Total amount to credit of City Scales,		\$367.00

The following inventory will show property in charge of this department:

One twenty ton auto truck scale. Six weighing-bill books, office supplies and tools.

Respectfully submitted,

CHARLES E. LOMBARD,
Public Weigher.

REPORT OF THE TAX COLLECTOR

Pittsfield, Mass., Jan. 31, 1920.

REPORT OF THE ASSESSORS OF TAXES

Pittsfield, Mass., January 22, 1920.

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

The Assessors herewith respectfully submit their annual report for the year 1919.

ORGANIZATION

The organization of the Board was as follows:

Chairman

JOSEPH H. MORAN

Secretary

FRED H. PURCHES

Assistant Assessors

Ward 1,	Frank A. Shepardson Harrison L. Lasuer John J. Southern
Ward 2,	Timothy E. Buckley
Ward 3,	Lincoln G. Alexander Benjamin P. Humphrey
Ward 4,	Charles D. Barron
Ward 5,	Ernest A. Shepard
Ward 6,	Joseph F. McGuire
Ward 7,	Henry C. Roy

Frank A. Shepardson resigned and Harrison L. Lasuer was appointed to succeed him. Mr. Lasuer resigned and John J. Southern was appointed in his place. Lincoln G. Alexander resigned and Benjamin P. Humphrey was appointed to succeed him.

WARRANTS RECEIVED

A city warrant was received May 17, 1919, directing a tax levy of	\$1,031,826.50
A county warrant was received Aug. 19, 1919, directing a tax levy of	72,738.32
A state warrant was received Aug. 2, 1919, directing a tax levy for state tax of	94,710.00
A state warrant was received Aug. 2, 1919, directing a tax levy for state highway of	3,654.50
A state warrant was received Aug. 2, 1919, directing a tax levy for state auditing of	21.88
A state warrant was received Aug. 2, 1919, directing a tax levy for special state tax of	5,682.60
	\$1,208,633.89

APPROPRIATIONS

The City Council passed an order March 13, 1919, appropriating for payment of city debt and interest,	\$228,488.50
And for payment of municipal expenses,	803,338.00
Total,	\$1,031,826.50

Pursuant to provision of law, the Assessors deducted from the appropriations for municipal expenses and debt and interest the sum of the estimated revenue of the city for the current year, the sum being \$124,773.00, and in addition a sewer fund of \$3,800 and overlay of 1915, amounting to \$5,600, the total of above stated sums being	134,173.00
	\$897,653.50

Pursuant to provision of law, the Assessors deducted from the appropriations for municipal expenses and debt and interest the amount of the City's share from the State Income Tax, the sum being, as advised by Tax Commissioner Trefry on July 31, 1919,	38,578.18
	\$859,075.32

The Assessors also deducted from the appropriations for municipal expenses and debt and interest the amount of the City's share from the General School Fund, the sum being, as advised by Chairman Joseph E. Peirson of the School Board, on Aug. 12, 1919,		39,050.00
Balance was raised by taxation,		\$820,025.32
Total deducted,		211,801.18
		\$1,031,826.50

TAX LEVY

Balance of appropriations,	\$820,025.32
County Tax,	72,738.32
State Tax,	104,047.10
Overlay,	9,901.98
State Auditing,	21.88
Total,	\$1,006,734.60

RATE

The rate of taxation as fixed by the Assessors, August 21, 1919, was \$23.50 on \$1,000 of the valuation.

RATE DIVIDED

The rate for raising the appropriation for municipal expenses and overlay,	\$14.3378
For payment of debt and interest,	5.4113
For raising that portion of the state tax to be assessed on property of the city,	2.2522
For raising that portion of the county tax to be assessed on property of the city,	1.4982
For state auditing,	0.0005
	\$23.5000

TAXES EXTENDED

Tax on real estate,	\$824,084.25
Tax on personal estate,	161,590.35
Poll Taxes,	21,060.00
	\$1,006,734.60

TAXES COMMITTED TO COLLECTOR

A list of taxes, including non-resident bank taxes, street watering taxes and sewer and paving apportionments due in 1919, was committed to Clifford H. Dickson, Collector, with our warrant, Sept. 16, 1919.

This list was made up as follows:

State Tax,	\$104,068.98
County Tax,	72,738.32
City Tax,	820,025.32
Non-resident Bank Tax,	13,176.80
Overlay,	9,901.98
Sewer Apportionment and Interest,	1,288.78
Paving Apportionment and Interest,	23.84
Street Watering Tax,	22,021.52
	\$1,043,245.54

SUPPLEMENTARY ASSESSMENT

An additional assessment of property and polls which was omitted at the annual assessment of taxes was made December 20, 1919, as follows:

142 Polls,	\$284.00
Real Estate,	311.38
Personal Estate,	17.50
Total,	\$612.88

VALUATION

Real Estate,	\$35,067,415.00
Personal Estate,	6,876,185.00
	\$41,943,600.00
Omitted Assessments,	13,995.00
	\$41,957,595.00
Abatements,	62,695.00
Net Valuation,	\$41,894,900.00

EXTRACTS FROM THE TABLE OF AGGREGATES

Number of persons assessed for poll tax only,	7,124
Number of persons assessed on property,	7,647
Number of residents assessed on property,	6,992
Number of non-residents assessed on property,	655

REPORT OF THE BOARD OF HEALTH

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

The Board of Health herewith submits the annual report for the year ending December 31, 1919.

On February 11, 1919 the Board consisting of Mr. LeRoy E. Shaw, Mr. James O'Neil, and Doctor Harry G. Mellen organized and elected Mr. Shaw as Chairman.

Monthly meetings have been held during the year.

Since April 1, 1919 the detail work of the administration of the Health Department has been given to the Health Officer. The Board retaining all executive and legislative functions as given them by ordinances and statutes.

The personnel of the Health Department has been as follows:

A. L. Stone, M.D., Health Officer

Thomas J. Davis, Milk Inspector, Sanitary Inspector,
and Assistant Inspector of Slaughtering

Eugene O. Brielman, D.V.M., Inspector of Slaughtering

Miss Anna M. Sullivan, Nurse

Miss Norma Coster, Clerk

R. A. Woodruff, M.D., Bacteriologist

E. H. Howard, M.D., In charge of the Tuberculosis
Clinic

REPORT OF THE HEALTH OFFICER, A. L. STONE, M.D.

Surveys of the health work of Pittsfield which had been made prior to 1918, pointed to the need of a full-time administrator of the Health Department. The city had rapidly outgrown the possibilities of a Board of Health management, regardless of how conscientious the members of the Board might be. Consequently Pittsfield was one of the first cities of the State to create, by ordinance, the position of Health Officer.

Since April 1, 1919, I have had the honor to be the city's first Health Officer. I have endeavored to make efficient the working force of the Department and establish a foundation upon which a well rounded Health Department may be organized.

Public spirited individuals and organizations have, during the past, accomplished a great amount of good by initiating almost every branch of welfare work. There appears to be no reason why the city should not assume its responsibility and gradually organize a Department of Public Health to include the activities of these several organizations, in so far as they apply to the community health.

When a communicable disease prevails in a community a great amount of suffering, work and expense is entailed, all of which becomes excessive if not directed by a central authority.

All expenditure made from public funds to maintain a force of workers whose aim is to prevent disease, correct conditions which decrease the resistance to disease, teach the methods of proper living and the rights of the community over the individual, is the purchase price of Public Health. The value received is the number of well people who are kept well.

Carefully prepared statistics are not at hand with which to compare the figures obtained for the past year but a brief analysis of the tables appended may be interesting.

Mortality

There occurred during the past year 560 deaths, 73 of which were persons whose residence was outside of the city. Sixteen persons who claimed Pittsfield their residence died elsewhere; a net loss by death of 503 persons. The births were 1030, of which 64 died within the year; a gain by birth of 966 persons or, deducting the 503 loss by death, we have 464 or 1.13% natural increase.

Communicable Diseases

The reports of **Scarlet Fever** (49) and **Diphtheria** (12) were less than usual. With the new hospital in operation we should be able to combat these diseases more effectually.

Whooping Cough with a case report of 245, representing not over 50% of the actual number of cases which existed, proved more deadly (there were 7 deaths) than the more dreaded diseases. Until such time as the public realizes the danger from this disease, little can be done to decrease its spread when once it appears.

Tuberculosis, pulmonary 72, other forms 13, shows an increase of cases reported. This probably indicates no increase of the disease in the city but rather a better reporting by the physicians and the results of the work of the nurse detailed to that particular disease.

Typhoid Fever. In all cases, with exception of two which were doubtful, the infection occurred outside of the city and were brought here for treatment. With a prophylactic as well proven as the one we have, typhoid fever should gradually cease to exist.

Influenza. The cases which occurred in the early months of the past year were delayed cases from the epidemic as it occurred in the fall of 1918. The deaths were considerable as will be seen in the mortality table where twenty deaths were attributed to influenza in the month of March.

The date of this report allows me to write of the epidemic of influenza as it developed in 1920. About the middle of January a few cases were reported, then a week elapsed with no cases reported. From the beginning of the last week of January until the third week of February an ever increasing number of reports were received daily. After the peak had been reached, the characteristic decline was recorded.

The methods of combating the epidemic were along lines developed from the careful study of previous epidemics. The disease will spread with great rapidity to all available persons in spite of all known agencies to prevent it, hence the warning to avoid people who are sneezing or coughing (which should be done at all times) does little more than retard the progress of the disease. The closing of the theatres and other places where people congregate was thought to be unnecessary. In fact everything which might alarm the public and cause panic was carefully avoided, knowing full well that fear as felt by the public in the face of an overwhelming force lessens the resistance, both individually and collectively, to that force. Owing to the general scarcity of nursing help, many persons calling for a nurse were obliged to be content with the part time services of a nurse or a good domestic helper. Other organizations who had profited by their experience in the last epidemic were able to do good work and relieved much suffering. It can safely be said that the city passed through an epidemic of formidable proportion with as little unwarrantable suffering and expense as any city from which reports are forthcoming.

Milk Supply

The milk supply of this city has been a problem to which many of the public spirited citizens have given their attention.

Legislation or inspection can never produce lasting results until the public has evidence of what milk should be when produced and delivered in accordance with modern methods.

A cooperative milk exchange has been organized and is soon to commence business. The milk and cream which they will

sell is to come from dairies, the owners of which, because of their having a financial interest in the success of the business, will more readily conform to the regulations. The products will be pastuerized. According to scientific and practical investigation, the process destroys all disease producing elements. From a public health standpoint a milk supply made safe is very desirable. The inspection of the milk business as conducted during the past year revealed the fact that a very insignificant number of dealers were provided with the utensils necessary to conduct a milk business. With such a laxity of methods it is not surprising to find that the milk consumption of Pittsfield is but a trifle over 50% of what it normally should be. The inspection of our milk supply will be greatly simplified by a centralization of milk distribution and we hope to be able to recommend the free use of milk as a valuable food. At present the best dealers are unable to deliver milk to as many as would like to be accommodated.

Infant Mortality

Sixty-four deaths of infants under one year were recorded. There were 1030 living children born and 31 still births, giving an infant mortality rate of 62 per thousand births. Of the deaths recorded, 34 died before they were one month old; 21 were less than one week of age.

The infant mortality rate is low in comparison with past years, yet by enlarging upon the prenatal work which has been maintained by the Visiting Nurse Association we should be able to aid in allowing children to be born with a greater chance of surviving the trying months of early infancy.

The number of mothers who died from diseases incident to the puerperal state was 13. It would appear that with our enlarged nursing force and more intimate association with the people we will discover the expectant mothers and inform them of the necessity of consulting their family physician early.

School Inspection

The School Committee has allowed the transfer of the medical inspection of school children from their department to the Health Department. The Mayor and Council have appropriated the funds to allow of two school nurses and four school physicians being employed.

The Health Department has a larger field of operation in that it can supervise all school children whether in public, parochial or private schools and it is hoped that a better control of communicable diseases may be obtained. The defects of school children if allowed to go uncorrected place a handicap upon the physical and mental development of the child. When the defects are found by the examining physicians and dentists, the parents of the child will be referred to the family physician or dentist and the nurses will follow up the recommendation to see if the family can be induced, for its own advancement, to have the corrections made.

An effort will be made, with the aid of the dental profession who have generously given their services, to get a record of the condition of the teeth of as many school children as is possible before the schools close for the summer vacation. With this data, the school nurses will be employed to urge the necessary work being done during the summer months. From the standpoint of personal and public health, it is a regrettable fact that so little attention is paid to the value of good teeth and clean mouths. The good teeth are needed for the proper mastication of food and the mouth which contains decaying teeth is a possible menace to the public health by reason of the diseases of children being more likely to find favorable soil for their development.

The work to be done is almost unlimited but doing the parts from which the most value may be received seems the best policy with our present appropriation.

Nuisances

The cause of the greatest number of complaints of untidy conditions has been failure to remove ashes and rubbish, or

persons unknown dumping ashes or rubbish on another person's property. Much of this trouble could be avoided by a proper collection, especially in sections of the city which tenants have no place to deposit their ashes.

A collection does not seem a necessity in more than perhaps one half of the city, the other half prefers the system of storing ashes until spring and having them removed at one time. An effort has been made to have all truckmen deposit ashes and rubbish at designated points but many irresponsible drivers and individuals with small conveyances dump promiscuously throughout the city making an occasional nuisance but always an unsightly effect.

A temporary solution of the trouble would be a petition of enough residents of certain sections to engage collectors to take ashes and rubbish which had been brought to the property line in suitable containers, the price to be standardized for a certain amount of material. The cost should be no greater than it is at present, yet the dumping would be more effectually controlled.

It is evidence of civic pride to have residents complain of unsightly surroundings and the city should, through its Board of Public Works or Board of Health, at least supervise the collection of ashes and rubbish and help keep the city clean.

Slaughtering Inspection

The Slaughtering Inspector was present at the slaughtering of 424 beef cattle, 322 calves and 647 swine. All animals passed as fit for food were stamped, otherwise the carcass was condemned and destroyed. Several persons have been taken to court for illegal slaughtering. The greatest offense was that of killing immature calves and selling them without a stamp having been put on by an inspector.

The work of Dr. E. O. Brielman as slaughtering inspector and inspector of meat and provisions has been highly commendable.

Garbage Collection

The investigation of complaints of the failure to collect garbage proved conclusively that the system was too complex to allow of a satisfactory collection. The person who was under contract to collect garbage was obliged to grant to others the privilege of collecting from certain areas or establishments. Very often these selected collections contained the more valuable garbage, leaving the poorer grade garbage and more costly collection to the contractor. The lack of responsibility was evident.

The cost to the city for the above type of collection was \$6500 per year. If the collection was to be made by the city the cost, at the present level of material and labor, would be, approximately, \$15,000 per year with the possible deduction of \$3,000 for the sale of garbage, or \$12,000 net per year.

It has been thought best to ask for bids for the collection of **all** the garbage that has to be removed from the premises upon which the garbage is made or accumulated. This allows of a more or less definite amount of garbage to be used as a basis upon which to estimate the cost of collection and the value of the garbage collected.

The city should benefit by the increased value of the garbage as food for swine. Possibly at a later date it would be well to establish a municipal collection and feed the garbage to city owned swine.

Conclusion

The organizing of a Health Department is by necessity slow, its growth is by development of the different divisions of effort. To keep the proper balance in the combined endeavors is the main desire. The money expended should be allotted to do the most good.

Cities differ as do individuals. They have their problems to solve irrespective of how other cities may have solved theirs. No one plan seems applicable to all cities.

A better acquaintance with the work of the Department will demonstrate the fact that those who have the welfare of Pittsfield at heart started none too soon an honest effort to place Pittsfield on the "Health Map" in a position which her standing as a municipality warrants.

I wish to thank all city officials and private individuals for the courteous treatment accorded me.

Very respectfully,

A. L. STONE, M.D.

REPORT OF INSPECTOR OF ANIMALS

To His Honor, the Mayor, and the Honorable City Council:

I hereby submit my annual report for the year ending December 31st, 1919.

Total number of cattle examined in annual inspection,	1,021
Total number of swine,	1,107
Total number of sheep,	3
Total number of horses examined coming in from out of the State,	178
Total number of cattle examined coming in from out of the State,	35

Most respectfully yours,

M. J. CONE,

Inspector of Animals.

Jan. 30, 1920.

REPORT OF THE INSPECTOR OF WIRES

To His Honor, the Mayor, and the Honorable City Council:

Gentlemen:

I hereby submit my report for the year 1919:

Number of applications for wiring,	510
Number of applications for fixtures,	100
Number of inspections made,	907
Number of permits issued to Pittsfield Electric Company to connect wires and supply current,	298
Notifications by mail and otherwise,	29
Number of new houses wired,	58
Number of old houses wired,	233
Number of offices wired,	7
Number of stores wired,	101
Number motors wired for,	49
Number of Garages,	16
Number heating circuits wired,	5
Number of Blocks wired,	10
Number of Manufacturing plants wired,	20
Number of Barns wired,	20
Number of Churches wired,	6
Number of Club rooms wired,	5
Number of Theatres wired,	3
Number of Moving Picture Theatres wired,	1
Number of Hotels wired,	5
Number of Hospitals wired,	5
Number of School houses wired,	2
Number of ice houses wired,	1
Other than above mentioned,	9

Twenty-One (21) new lights have been added to the "White Way" lighting system during the year.

A large number of feet of conduit has been put underground this year, both by Pittsfield Electric Company, and the New England Tel. and Tel. Company, made necessary by the new paving just completed.

Respectfully submitted,

WILLIAM F. FRANCIS,

Inspector of Wires.

ORDINANCES OF THE CITY OF PITTSFIELD

No. 58. **An Ordinance:**

Making Increases in Compensation in the Police Department

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. Section 1 of Chapter VI of the Revised Ordinances, amended by Ordinances Nos. 14, 33 and 37, is hereby further amended by striking out that portion of Section 1 relating to Police Department and inserting in place thereof the following:

POLICE DEPARTMENT

Chief of Police, Three Thousand Dollars per annum.

Captain of Police, Twenty-five Hundred Dollars per annum.

Inspectors of Police, Each Twenty-four Hundred and Fifty Dollars per annum.

Sergeants of Police, Each Twenty-three Hundred and Fifty Dollars per annum.

Patrolmen, Each Four and One-half Dollars per day for the first year of service, and Five Dollars per day after the first year of service.

Patrol Drivers, Each Four and three-quarters Dollars per day.

Reserve Police Officers, Each Four and one-half Dollars per day when on duty.

Police Matron, Four and three-quarters Dollars per day when on duty.

Section 2. This Ordinance shall take effect December 1, 1919.

Approved, October 21, 1919.

No. 59. **An Ordinance:**

Regulating the Purchase and Sale of Second-Hand Motor Vehicles and Parts thereof

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

That under the provisions of Chapter 259 of the Acts of the General Court of the Commonwealth of Massachusetts, entitled "An Act to Regulate the Purchase and Sale of Second-Hand Motor Vehicles and Parts Thereof," the license fees for licenses prescribed by said Act shall be as follows:—

Class 1. Five Dollars

Class 2. Ten Dollars

Class 3. Ten Dollars

Approved, Nov. 13, 1919.

No. 60. **An Ordinance:**

Making Increases in Compensation in Fire Department

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. Section 1 of Chapter VI of the Revised Ordinances, amended by Ordinances Nos. 12, 19, 28, 35 and 38 is hereby further amended by striking out that portion of Section 1 relating to Fire Department and inserting in place thereof the following:

FIRE DEPARTMENT

Chief Engineer, Twenty-seven Hundred Dollars per annum.

Assistant Engineer, Twenty-four Hundred Dollars per annum.

Captains of Fire Stations, Each Twenty-two Hundred Dollars per annum.

Lieutenants, Each Twenty-one Hundred Dollars per annum.

Permanent Firemen, Each Four and one-half Dollars per day for the first year of service, and Five Dollars per day after the first year of service.

Permanent Fireman acting as Mechanician, Nineteen Hundred Dollars per annum.

Call Firemen, Class A. Two Hundred Dollars per annum. Also, an additional compensation of Fifty Cents per hour for services rendered at the place of a fire by order of an engineer after the apparatus has been returned to the station.

Class B. Fifty Cents per hour during the time actually in attendance and in the performance of their duties as such call firemen.

Provided, however, that the yearly increase for salaries of permanent firemen, as above set forth, and all subsequent annual increases of salaries of any fireman shall not be made, allowed or paid unless the fireman or firemen to be thereby benefited shall first obtain from the chief engineer and the assistant engineer a certificate stating that the qualifications and previous service of such fireman or firemen are and have been such as to entitle him or them to receive such an increase.

Section 2. This Ordinance shall take effect December 27, 1919.

Approved, Dec. 24, 1919.

No. 61. **An Ordinance:**

Establishing Salary of Water Inspectors and Janitor of City Hall and City Messenger

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

No. 49. An Ordinance:**Providing for Two Inspectors of Police**

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1 of Chapter XV of the Revised Ordinances is hereby amended by striking out said section and inserting in place thereof the following:—

Section 1. The police department shall consist of the chief of police, a captain of police, two inspectors of police, two sergeants of police, ranking in the foregoing order, and such number of officers and patrolmen as the city council shall determine. The inspectors of police shall have the rank of lieutenant and shall perform such detective and other duties as the city council may prescribe. The above officers shall perform all duties, and be subject to all rules and regulations prescribed by law, by the ordinances, or the orders of the Board of Aldermen. They shall not, during their incumbency of office as such, engage directly or indirectly in any other business or employment. The mayor and aldermen may, from time to time, appoint such number of patrolmen or officers for special duty, to serve with or without pay, as may be required, and may limit their time of service. The persons thus appointed shall be subject to the provisions of law and of the city ordinances so far as the same are applicable, and to all rules and regulations approved by the Mayor and Aldermen.

Approved, Feb. 19, 1919.

No. 50. An Ordinance:

Increasing Salary of Board of Assessors

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. That Chapter 6, Section 1, lines 17 and 18 of the Revised Ordinances, is hereby amended by striking out the words, "Board of Assessors, each member thereof Fifteen Hundred Dollars per annum" and substituting therefor the following:

Board of Assessors, each member thereof Seventeen Hundred Dollars per annum.

Section 2. This ordinance shall take effect upon its passage.

Approved, Feb. 19, 1919.

No. 51. An Ordinance:

**Establishing the Compensation of Clerical Assistants in Certain
Departments of the City**

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. The compensation to be paid to the assistant clerk shall be \$1,000 for the first year of service and upon the written recommendation of the head of that department, shall be \$1,100 per annum for the year not earlier than the second year of service. Upon like recommendation the compensation for said office shall be at its maximum in the sum of \$1,200 per annum not earlier than the third year of service.

Section 2. The compensation to be paid to all other clerical assistants in the offices of the City Treasurer, the City Auditor, the Board of Public Works, the Board of Overseers of the Poor, the Board of Health, the City Clerk, the Board of Assessors, the Collector of Taxes, shall be at the rate of \$600 per annum for the first year of service, and for any succeeding year may be increased in the sum of \$100 per annum upon the written recommendation of each increase by the officer or board heading the department until such compensation shall reach the sum of \$1,000 per annum, which shall be the maximum compensation for clerical assistants coming under this section.

Section 3. This ordinance shall not operate to reduce the amount of compensation now being paid by the city in any instance. This ordinance shall operate and apply only where it does not conflict with any operative rule or regulation of the Civil Service Commission of the Commonwealth or any law of the Commonwealth now or hereafter applying hereto.

This ordinance shall take effect March 1, 1919.

Approved, Feb. 19, 1919.

No. 52. An Ordinance:

Requiring Licenses for Fruit, Fish and Vegetable Peddlers.

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. No person, except one engaged in the pursuit of agriculture shall go about from place to place within this city carrying or exposing for sale, or selling fruits, vegetables or fish in and from any cart, wagon or other vehicle, or in any other manner, without a license therefor from the Board of Health.

Section 2. The licenses shall bear date of the day they are issued and unless sooner revoked by the Board of Health, shall continue in force for one year from such date, and each person so licensed shall pay therefor a fee of five dollars. No license shall be so granted until the applicant has shown that his weights and measures have been sealed.

Section 3. Every hawker and peddler licensed by the Board of Health shall be assigned a number and shall be provided with a badge which shall be conspicuously worn by the licensee. Whoever neglects to wear, or wears such badge without authority, shall be punished by the penalty provided in section seven of this ordinance.

Section 4. Every vehicle or other receptacle, used by a licensee as a conveyance for articles offered or exposed for sale by him shall have his name and his residence, with street and number, if any, legibly placed in letters and figures, not less than 2 inches in height, upon each outer side of vehicle or other conveyance.

Section 5. Any licensee who fails, neglects or refuses to exhibit his license when the same is demanded, of him by a sealer or deputy sealer of weights and measures or police officer shall be subject to the same penalty as if he had no license.

Section 6. Any license granted under this ordinance or any ordinance amendatory or additional thereto, may be revoked by the Board of Health for cause.

Section 7. Whoever violates any provision of this ordinance shall be punished by a fine not exceeding twenty dollars for each offence.

Section 8. A copy of this Ordinance shall be printed on every License.

Section 9. All ordinances or parts of ordinances inconsistent herewith are hereby repealed.

Approved, March 13, 1919.

No. 53. An Ordinance:**Establishing a Tax Rate or Tax Limit for the City of Pittsfield**

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. Section 5 of Chapter IV of the Revised Ordinances of the City of 1915 is hereby amended by striking out said section and inserting in place thereof the following:—

Section 5. The taxes assessed on property taxable in the City, exclusive of the state tax and other amounts assessed upon the City by the Commonwealth, the county tax, and sums required by law to be raised on account of the City debt, shall not exceed Fifteen Dollars on every one thousand dollars of the average of the assessors' valuation of the taxable property for the three years next preceding such assessment; such valuation being first reduced by the amount of all abatements allowed thereon previous to the 31st day of December in the year preceding such assessment.

Approved, March 12, 1919.

No. 54. An Ordinance:**Establishing the Salary of the City Health Officer**

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

The compensation to be paid to the City Health Officer shall be three thousand dollars per annum.

Approved, April 30, 1919.

No. 55. **An Ordinance:**

Establishing the Salary of the Mayor of the City of Pittsfield

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

The mayor of the City of Pittsfield shall receive a salary of Eighteen Hundred Dollars (\$1800) per annum, beginning with the first Monday of January, 1919.

Approved, June 24, 1919.

No. 56. **An Ordinance:**

**Amending the Building Ordinance Relative to Roofs in the
First Fire District**

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 15 of Chap. XII of the Revised Ordinances, entitled construction of Buildings and Fire Limits, is hereby amended by striking out, in the second paragraph of said section, the following words:—

“No such roof shall be recovered until the original covering has been wholly removed.”

Approved, June 24, 1919.

No. 57. **An Ordinance:**

Increasing Salaries of The Board of Registrars of Voters

*Be it ordained by the City Council of the City of Pittsfield,
as follows:*

Section 1. That Section 1 of Chapter 6 of the Revised Ordinances be, and it is hereby amended by striking out the words, "Board of Registrars of Voters, each member thereof, Three Hundred Dollars, per annum" and inserting in place thereof the words, "Board of Registrars of Voters, each member thereof, Four Hundred Dollars, per annum."

Section 2. This Ordinance shall take effect upon its passage.

Approved, Aug. 19, 1919.
